About Us

Established in 1995, Vikas Enterprises has over time built a credible reputation in the field of packaging industry. We work as a distinguished wholesaler, trader, and retailer by offering an enormous variety of Lamination Film such as Polyester Film, BOPP Film, PVC Film, Thermal Film, Metalize Film, Holographic Film, Golden Film in all available micron and sizes. We also offer Kraft Paper, Cup stock paper, LD, HM, PP and Lamination Adhesives, hence we provide the ultimate end to end solution.

"Perfect" has been in the business of PVC Lamination manufacturing since the year 2004. Having garnered a good name in the field of PVC Lamination, we have always strived to be recognized as a company that provides its clients with exceptional Quality expertise along with assisting the stakeholders in reaching new heights, both professionally and personally. At "Perfect" we have just one simple principle, which is to 'exceed every expectation'. To achieve this sole principle, our team of skilled and experienced professionals works together, day and night.

As a 9001:2015 and 14001:2015 ISO certified company, we have attained specialization in manufacturing 4-micron to 15-micron films, in all sizes.

Our team of skilled and trained professionals offer a great range of services to our clients. Prior to dispatch, the quality of our films is duly tested by experts. This ensures that the quality we are offering to our customers always matches the expectations of our clients. We have attained a credible position in this field due to our great expertise.

Mission: -

To grow continuously as a Qualitative manufacturing unit by surpassing the customer expectation through innovative practices

Vision: -

To be recognized as a Prominent Choice of PVC Lamination Films by our stakeholders through business excellence

Values: -

Passion to innovate

Empirical approach to know customer needs

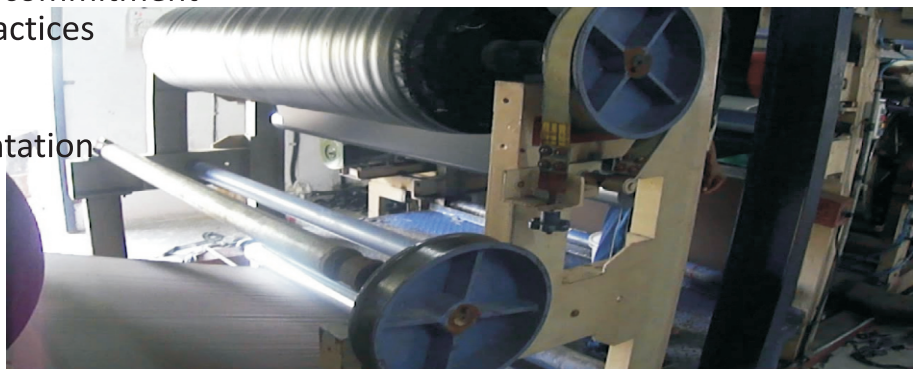

Reliable in Qualitative service and commitment

Futuristic for adopting modern practices

Epic for surpassing the ordinary

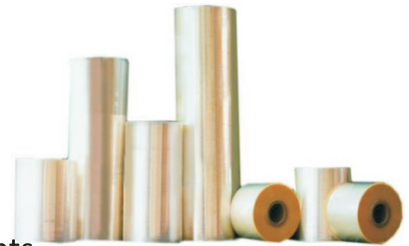

Cultured for refining the manners

Team Spirit towards the goal orientation

BOPP Films: -

- Low density gives high yield and cost effective when compared to other films
- Excellent gloss and wonderful clarity give it an amazing look
- Dimensional stability and flatness due to low electro static charge
- Tendency to resist moisture, chemical and act as a barrier for other pollutants makes this an ultimate choice for various applications
- Good performance on high speed printing
- Available from 6 to 50 microns
- Gloss as well as Matte finish
- Used in covering the electrical appliances, laminations and printing
- covering the Books and Note Books
- Used in order to act as a barrier for moisture, chemicals and pollutants
- Adhesive and pressure sensitive tapes are also made by using BOPP films
- White and opaque BOPP films are also used in a number of applications- printing, packing, cable over wrapping etc.

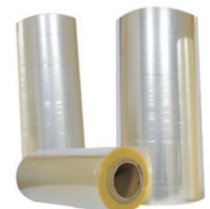

Polyester Films: -

- Excellent clarity and high glossy as compared to other Polymers like BOPP/PVC
- Good resistance against oils and greases
- Stiffness in Polyester is more than BOPP and hence give more luster
- Available in 4micron to 150 microns
- Used in various fields after coating of different materials and colors
- Hotstamping, Decoration, Release Films, Notebook covers, Garments, Embossing etc.
- Used in electrical insulation of wires and cables
- Laser Print labels, hologram, printer ribbons and X ray Films
- Microwave Films, Pouches of multilayer, Pharmaceutical packaging, Cosmetic packaging

PVC Films: -

- Our PVC is of world class standards and is of unbeatable quality, as of 'Perfect' brand it is widely known and accepted for its durability and performance
- Available between 4.5 to 15 Mic
- Width is 75mm to 950mm
- Wraps for detergent cakes, soaps, books, posters
- Corrugated boxes for electrical appliances and gift items
- Window envelopes
- Kela patta printing
- Laminate copy cover
- Used to cover and laminate the outer surface of cartons that are used to store pharmaceuticals, cosmetics and readymade garments and hosiery

Thermal Lamination Film: -

- Velvet feel and organic look
- Excellent Bonding Strength
- Depending upon the application, it can be Glossy look and Matte
- Available in 20 to 25 Microns
- Used in document lamination, Layering on Greeting Cards, Shopping bags
- The film is highly recommended to give a premium look to novels and books

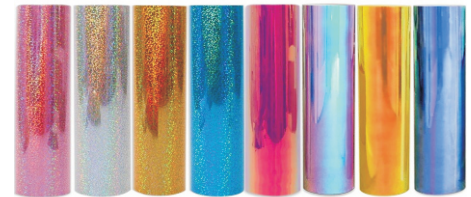

Metalize Films (Met Pet / Met BOPP):-

- They are the available with both Polymers: Polyester Metalized and BOPP Metalized
- Available from 6 to 50 Mic
- Made from high coating technology
- Bright colors make it attractive
- Coating helps it to acts as a barrier against moisture and chemicals
- Used on paper or box for decoration purpose
- Paper plates also have an outer covering of this layer
- Cosmetic boxes and gift boxes
- Yarns are also made using this film that re later used for decoration
- Thermal Silver is used in cake base items

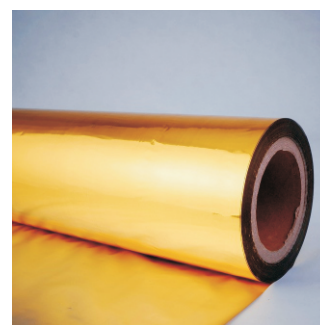

Holographic Films: -

- The texture of our holographic sheet is smooth and flexible.
- It is visible from all the angles
- 3 dimensional effects and alluring designs
- Excursion coated with special adhesive
- They are utilized for promotional purposes along with gift packaging solutions
- Used in Logos, Labels and Symbols
- Available in 8 mics to 30 microns

Golden and Matt Golden Films: -

- Available from 8 to 25 Mic
- Polyester as well as BOPP base
- Best quality ingredients are assured
- Excellent ink bonding
- Metallic finish and alluring look
- Matt Finish is suitable for UV spot coating
- Decoration of cosmetics, perfumes, diaries, cards and tray
- Also used in Gift wrapping
- Brochures, Folders, Posters, Magazines
- Used in cake base items

Lamination Adhesive:-

- Used in lamination of wet films like BOPP, PET, PVC
- Available in Local brands, Chipko and Pidilite
- High viscosity, better bonding and good heat resistance
- Available in 50/55 Kg packing
