

# AG FASTENERS

Manufacturing and Marketing of Nails in India for Over 20 Years

**ISO 9001:2015 company**

# ABOUT US

AG Fasteners is a highly reputable company with a focus on producing top quality 21° Plastic Collated Framing Nails and 15° Wire Collated Nail Coils with Smooth / Ring / Screw Shank and Bright / Electro-Galvanized (EG) / Hot-Dip Galvanized (HDG) finish. We also manufacture a range of hand drive nails, including common nails, finishing nails, electro-galvanized roofing nails, vinyl coated smooth sinker nails, stainless steel siding nails, and wood siding nails. Our company has been in the hand drive nail production and marketing industry for over 20 years, and expanded our operations to include production of strip nails / coil nails to be used with pneumatic nail guns.

Our plant and machinery, imported from renowned manufacturer K. Ticho Industries Company - Taiwan, is located in the Greater Noida, (U.P.), India, just 10 miles from the ICD-Dadri dry port. We transport containers from this port to the JNPT-Mumbai / Mundra sea port in Gujarat via train. AG Fasteners is managed by a team of professionals and skilled technocrats who are well-versed in the production process and are always seeking out new technologies to improve our operations.

At AG Fasteners, we are committed to producing high-quality strip nails and coil nails in a range of materials, including stainless steel, mild steel, and carbon steel. Our nail sizes range from 0.82 inches (2.08 mm) to 0.148 inches (3.75 mm) in diameter, with lengths from 1.25 inches (31.75 mm) to 6 inches (150 mm). We produce nails having Smooth / Screw / Ring Shank and Bright / EG / HDG finish. Our plant is semi-automated to optimize efficiency and maintain a high standard of quality.
