HIGH SPEED DOORS FOR PHARMACEUTICAL INDUSTRY

Toshi high speed clean room door optimizes your cleanroom operation. Pressure levels are kept stable, air leakage is minimized and the exchange of contaminants and airborne particles is significantly limited. The superior seal over the full perimeter of the cleanroom door and its fast cycle, reduce the loss of conditioned air. Over the long run, this represents significant cost savings.

High speed cleanroom doors are ideal to build airlocks. Their flexible PVC door curtain resists to pressure differences and keeps your cleanroom in under or overpressure. Cleanroom doors have an aesthetical and slim design. They require little space and can easily be installed in tight places.

High Speed Door for Warehouses

Automatic Rolling Shutters

Conveyor Doors

Entrance Solutions for Safety

Boom Barriers

Automatic Sliding Doors

Automatic Sliding Gates
