About Prakruti

Prakruti Paper Straws was launched in response to a growing anti-plastic movement worldwide. Parent company Arihant Paper Products, created an environmentally friendly Paper Straw. Today we offer Non Printed, Printed, Wrapped and Bendable paper straws that are biodegradable, food grade, durable, customizable and Made in the India.

Team of young Ecopreneurs are working tirelessly to offer sustainable, eco-friendly options for Restaurants, Retailers, and Service industries. So, while enjoying a cocktail, Smoothie, or a Soda, the end consumer can feel pride in their little contribution to Mother Nature. For more information, visit prakrutipaperproducts.com.

Prakruti Goes Green

Prakruti's products provide a sustainable, alternative solution to plastic straw use. Made in the India, all our products being made of paper, are naturally degradable and will compost with no added chemicals or harmful dyes used in the manufacturing process. Prakruti aims to educate businesses, restaurants and consumers about the benefits of using paper drinking straws instead of plastic straws.

We are working on a mission to eradicate the usage of plastic from Food. We are working diligently to provide our customers with a sustainable and eco-friendly alternative to plastic products. Currently, we offer a range of Paper Straws in various size and designs. Paper straws are more appealing, fun & safer for the environment. We have our own in-house printing machine so that we can tailor our design as per customer needs.

Thank you for your interest in Prakruti® Paper Drinking Straws.

We are proud to be the manufacturer of paper drinking straws in India. Our straws are made of safe and food grade materials. They are biodegradable, compostable and sustainable. We also have the ability to create custom logo designed straws and wrappers - Putting your brand and message at your customer’s fingertips.

BIO-PLASTIC IS NOT THE WAY

Biodegradable plastic 'false solution' for ocean waste problem

Biodegradable plastic water bottles, bio-plastic straws and shopping bags are a false solution to the ubiquitous problem of litter in the oceans, the UN's top environmental scientist has warned. Bio-Plastic is well-intentioned but wrong. A lot of plastics labeled biodegradable, like shopping bags, PLA straws will only break down in temperatures of 50C and that is not the ocean. They are also not buoyant, so they're going to sink, so they're not going to be exposed to UV and break down. There is a moral argument that we should not allow the ocean to become further polluted with plastic waste, and that marine littering should be considered a 'common concern of humankind.

BIO-PLASTIC/PLANT/PLA STRAWS

- ◆ ARE CONSIDERED A SUSTAINABLE ALTERNATIVE TO PLASTIC STRAWS, BUT DISPOSING OF ANY TYPE OF PLA, BIOPLASTIC OR “PLANT-BASED” PLASTIC IS NO DIFFERENT THAN THROWING AWAY A REGULAR STRAW.
- ◆ REACT EXACTLY LIKE PLASTIC STRAWS IN A NORMAL WASTE STREAM. IT’S ALMOST IMPOSSIBLE FOR THEM TO DECOMPOSE IN A LANDFILL, AND IF THEY DO, IT CAN TAKE OVER 1,000 YEARS.
- ◆ BEHAVE LIKE “REGULAR” PLASTIC IN WATERWAYS OR OCEANS, OFTEN HARMING, ENDANGERING OR KILLING WILDLIFE AND FISH.
- ◆ ONLY BREAK DOWN WHEN ALL OXYGEN IS REMOVED, AND TEMPERATURES ARE CONSTANTLY ABOVE 140° F FOR AT LEAST 10 DAYS. THIS OCCURS IN A COMMERCIAL COMPOSTING SITE ONLY.

PRAKRUTI PAPER STRAWS

- ◆ **ARE 100% COMPOSTABLE AND MARINE FRIENDLY.**
- ◆ **CAN DECOMPOSE EASILY.**
- ◆ **ARE EARTH AND MARINE FRIENDLY, NATURALLY DEGRADABLE.**
- ◆ **PRAKRUTI PAPER STRAWS DOES NOT REQUIRE ANY SPECIAL TREATMENT TO BREAKDOWN SAFELY.**
- ◆ **'IT'S JUST ONE PLASTIC STRAWS, SAID 8 BILLION PEOPLE'**
