About Us

Tea Engineering Works is a name in itself for its reliable solutions in the processing sector, as a tea and food processing machinery -manufacturing, supplying, and exporting company. The company operates with a sound knowledge of tea and food processing and aims at overcoming challenges in food or tea processing through its efficient tea and food processing machines, even in a continuous process. Our objective is even more specific, and our machinery works with the aid of a sound knowledge of food tea processing requirements and operates in a world-class manner, even in a hard and continuous environment. The designs conserve the natural quality, aroma, and characteristics of tea and food materials even in drying, sorting, and heat exchange operations with a sound and strong capacity for quality output.

Hygiene, food safety, and other related aspects have remained prominent in all designs, thanks to hygienic designs, operability, and maintainability. Keeping in mind long-term functionality, the equipment used in these designs has been made robust enough to handle industrial operations. Technical knowledge and process know-how have helped build trust among clients who are connected with large-scale processes.
