

## Extraction Arms - Self Locking Type

For single and multiple welding stations suction arms fully or partially adjustable in three axis (X, Y & Z). These arms are connected to a network of ducts. The suction is generated by a centrifugal blower and the air carrying fumes can be either exhausted untreated or can be treated to remove contaminants before exhausting.

Available in 4, 5, and 6 inches diameters, and lengths from 1.5 meter to 3mtrs.

### Benefits:

- Easy to use
- needs almost no maintenance

### Three Adjustment Points -

- twin-axis adjustable head
- externally mounted
- Linkages.

This series is completely developed & manufactured in India, and based on experience of NUSID CLEAN TECH.
