ARMoured CABLE**

About Us

Bansal Electricals is a dependable trader and supplier of high-grade electrical cables for different industrial, commercial, and household applications. Based on years of experience in the market, we aim to supply a full range of strong and dependable cables like Copper Armoured Cables, LT XLPE Power Cables, Aluminium Armoured Cables, Polycab Armoured Cables, KEI Copper Flexible Cables, etc.

At Bansal Electricals, we understand the tremendous value of quality electrical cables in ensuring the safety, efficiency, and performance of electrical installations. That is why we source our cables from recognized and established cable manufacturers to make sure that they are of quality and last for years to come. Our Copper Armoured Cables are widely known for their strength and high conductivity, thus making them highly appropriate for use in heavy load applications where the transmission of reliable power is required. Similarly, our LT XLPE Power Cables find application in low voltage power distribution and are resistant to electrical faulting, water, and temperature variation.

Our Aluminium Armoured Cables are more protected against external mechanical stress, and the Polycab Armoured Cables are superior for indoor and outdoor applications. Besides this, we also have KEI Copper Flexible Cables, which are flexible and are suitable to use where flexibility and convenience are a requirement.
