About Us

Indian Copper and Alloys is a reliable and well-known trader and supplier, dealing in the supply of high-quality copper and brass products to cater to the various needs of industries all over India and abroad. Under the umbrella of excellence, we provide a vast array of products, such as Brass Tubes, Brass Strips, Brass Foil, Flat Braided Copper Wire, Copper Flexible Connector, and more. These products are generally used in numerous industries, which include electrical, construction, automobile, and manufacturing.

Our focus on quality and customer satisfaction differentiates us from others in the industry. Our products at Indian Copper and Alloys are procured from quality manufacturers who are international standard setters, thus we assure superior quality and performance in all our products. All of our products pass through stringent quality checks to ascertain the highest benchmark in durability, strength, and functionality. In this way, we ensure our clients receive the best materials suited for their application.

We not only focus on quality but also reliability and efficiency in our operation. We build long-term relationships with our suppliers and partners, so we can give our customers constant and timely shipment. Whether in big industrial projects or small specialty requirements, we make sure our products are there in the amount and specifications they need. We are a seamless distribution network with strong logistics capabilities to be relied upon for any copper and brass requirements. Our company continues to be the preferred supplier for businesses looking for reliable, high-performance copper and brass materials with a reputation for trust, quality, and customer care.
