PVC : THE POISON PLASTIC

The Campaign For Safe, Healthy Consumer Products

PVC - Hazardous Consumer Product

PVC (polyvinyl chloride) plastic, commonly referred to as vinyl, is one of the most hazardous consumer products ever created. PVC is dangerous to human health and the environment throughout its entire life cycle. Our bodies are contaminated with poisonous chemicals released during the PVC lifecycle, such as mercury, dioxins, and phthalates, which may pose irreversible life-long health threats. When produced or burned, PVC plastic releases dioxins, a group of the most potent synthetic chemicals ever tested, which can cause cancer and harm the immune and reproductive systems.

One of the most common toxic additives is DEHP, a phthalate that is a suspected carcinogen and reproductive toxicant readily found in numerous PVC products. Children can be exposed to phthalates by chewing on the dress with PVC sequins.

Due to lack of awareness, the garment export houses are using PVC sequins on their dresses without knowing that these PVC sequins will effect the environment and also will cause many diseases for the human health.

In fact, this commonplace plastic is one of the most toxic substances saturating our planet and its inhabitants. PVC contaminates humans and the environment throughout its lifecycle: during its production, use, and disposal. Few consumers realize that PVC is the single most environmentally damaging of all plastics. Since safer alternatives are available for virtually all uses of PVC, it is possible to protect human health and the environment by replacing and eventually phasing out this poison plastic.

A Contaminant to Recycling :

PVC cannot be effectively recycled due to the many different toxic additives used to soften or stabilize PVC, which can contaminate the recycling batch. Most consumers do not know that a 3 in the recycle symbol indicates that the plastic is made of PVC, and therefore recycle those products, inadvertently rendering thousands of potentially recycled containers useless.

So **GO PVC FREE...**

G.Khandelwal - C.M.D.

About us

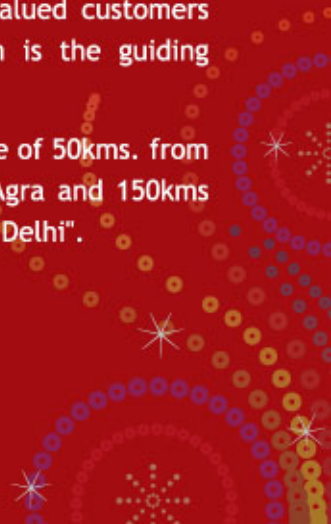

As part of Rasik Group of companies, Rasik Products Pvt. Ltd. (RPPL) is an offspring of Rasik Polyflexil Pvt. Ltd. that has been servicing the Flexible packaging industry from the last 20 years .

With a keen business sense and forecasting the industry demand , Mr. G. Khandelwal (CMD) founded Rasik Products Pvt. Ltd. in the year 2001 to revolutionize the Holographic industry and packaging concepts in India . Keeping in touch with changing trend , environmental requirements and diverse customer's requirements , the company has developed its own technical know-how for manufacturing Spangle pet films for Embroidery in Hologram, Normal, Matt, Rainbow, Multi & Other different colours, Textile stamping foils, Holographic Films, Security Hologram Films, Holographic Paper and other products .

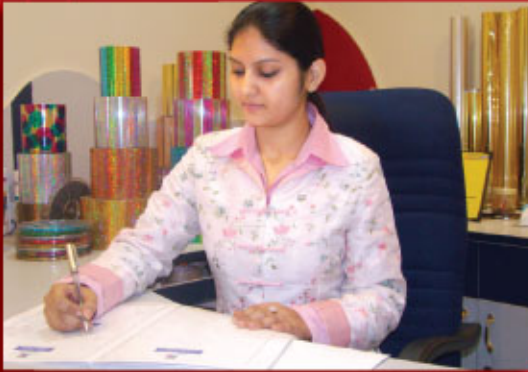

Our Spangle Pet Films are approved for export quality sequins and has passed all the test like PVC free, Cadmium free, Lead free, Phthalates free, Colour fastness to drycleaning and Colour fastness to washing.

Perfecting the manufacturing process by continuous efforts of experienced technocrats, RPPL seeks continuous improvements in its products with the help of advanced manufacturing process and indigenous technical solutions to meet the market needs. Strong belief in maintaining close and consistent relationship with their valued customers for achieving excellent satisfaction is the guiding philosophy at RPPL.

The company is located at a distance of 50kms. from wonder of the world "TAJ MAHAL" Agra and 150kms away from the capital of INDIA "New Delhi".

Spangle Pet Film for Embroidery

Spangle Pet Films are the base films for PVC free sequins and we are the first company in India who introduce this first time in the Indian market.

We have an ultramodern Lab and specialized team for R & D. We are developing new products for Textile Industries according to the new world of fashion trend. Spangle Pet Film is our best product in India compare with others. We have achieved a worldwide reputation for quality, reliability and service. Excellent brightness, eye-catching colours, very high temperature resistance and chemical resistance are the main characteristics of this product.

Temperature resistance properties

Ironing temperature	- upto 180°C
Dry Heat	- No change upto 150°C
Washing	- No change (any soap)
Steaming	- No change

Thickness	: 100/125/150 micron
Width	: 125mm/142mm or as per requirement
Length	: 500/1000 Mtrs in Roll form

Chemical resistance properties

Hot water, Ethanol, Ethyl Acetate, Toluene, Thinner, Carbon disulphide, Benzene - No Change

11 reasons to choose Rasik Sequins

1. Pioneers of PVC free film in India.
2. Highest colour range of PVC free sequins in the market.
3. No Harmful pollutants like phthalates, lead, cadmium etc.
4. Our Sequins can withstand temperature upto 180°C without changing any shape and colour.
5. Our Sequins will not loose colour during washing, dry cleaning, perk or any other test.
6. Quick sampling procedure.
7. New colour development as per customer requirements.
8. Lead production time within 7 days.
9. Closest to your premises.
10. Inhouse production capabilities from A-Z.
11. Accept the challenge to match your PVC sequins and convert it into PVC free and Phthalates free with no more price difference on your production cost .

**ALL COLOURS ARE AVAILABLE IN
CHAIN AND LOOSE SEQUINS FORM**
