About Us

We, **KRYFS Power Components Ltd. (KPCL)**, boast of a brilliant past and look forward to an equally bright future as a manufacturing company specializing in various raw materials required for constructing innovative transformers, CRGO laminations and transformer core. From humble beginnings, today we have become a powerful company with a formidable presence in the industry.

We planted our roots in **December 1992**, and have been identifying new ways to satisfy clients and take our business to unprecedented heights since then. As a manufacturer & service provider, we feel glad that for nearly 30 years we have been helping customers get easy access to the best designed **CRGO Lamination Core, Solar Transformer, MS Transformer Tank, Electrical Transformer Tank**, etc., backed with affordable Annual Maintenance Contractor Services.

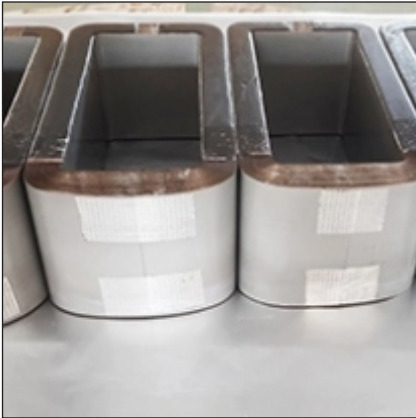

With our focus on improving the energy landscape of India with leading-edge products and intelligently-designed solutions encompassing the entire value chain of energy supply, we erected our first manufacturing plant in Palghar in Maharashtra. Our production capacity was of 120 MT per annum in December 1992, which we efficiently scaled up to 50,000 MT per annum in the year 2022. Our manufacturing excellence touched new heights with the installation of GEORG TBA 400 cut to length machines, and the production of low-loss AMORPHUS core loops for Distribution Transformers (1-phase and 3-phase) in the years that followed.

Quality Policy

The reputation of KRYFS as an industry leader has not been achieved overnight. Grueling hours of hard work for bringing improvements in our solutions while safeguarding our people and the Planet has helped us in coming this far. We realize that best serving the needs of customers, associates, employees and also stockholders can be a tightrope walk. However, we have managed turning every possibility into a new achievement through our relentless passion and undiluted commitment towards quality.

As many companies fight the price war and focus on pocketing profits, we at KRYFS keep quality at the heart of our operations. Considering it as something valuable and non-negotiable, we ensure that our factory is periodically inspected by certifying agencies as per the prescribed laws in many countries.

Our Products

Transformer Amorphous Cores

Industrial Power Transformer

MSEDCL Power Transformer

MS Power Transformer

Power Distribution Transformer

Industrial Distribution Transformer

MS Distribution Transformer

Electrical Distribution Transformer

MS Transformer Tank

Industrial Transformer Tank

Electrical Transformer Tank

33-11 kV Air Insulated Sub-Station, 2x5 MVA Power Transformer Solutions

Power Transmission-33-11 Air Insulated Sub-Station Solutions

11 KV East Ketaki Line Solutions

SBPDCL Pouthu Control Room 33-11 KV Solutions

Pouthu PSS 33-11 KV Solutions

300kwp Off Grid Solar Rooftop System

2.0363mwp Off Grid Solar Rooftop System
