ABOUT US

**Herbal Remedy for all
types of
Blood Cancers.**

VAID SYED KHALIQ AHMED SHIBLI CANCER CONSULTANT – C.A.R.S, D.A.M.

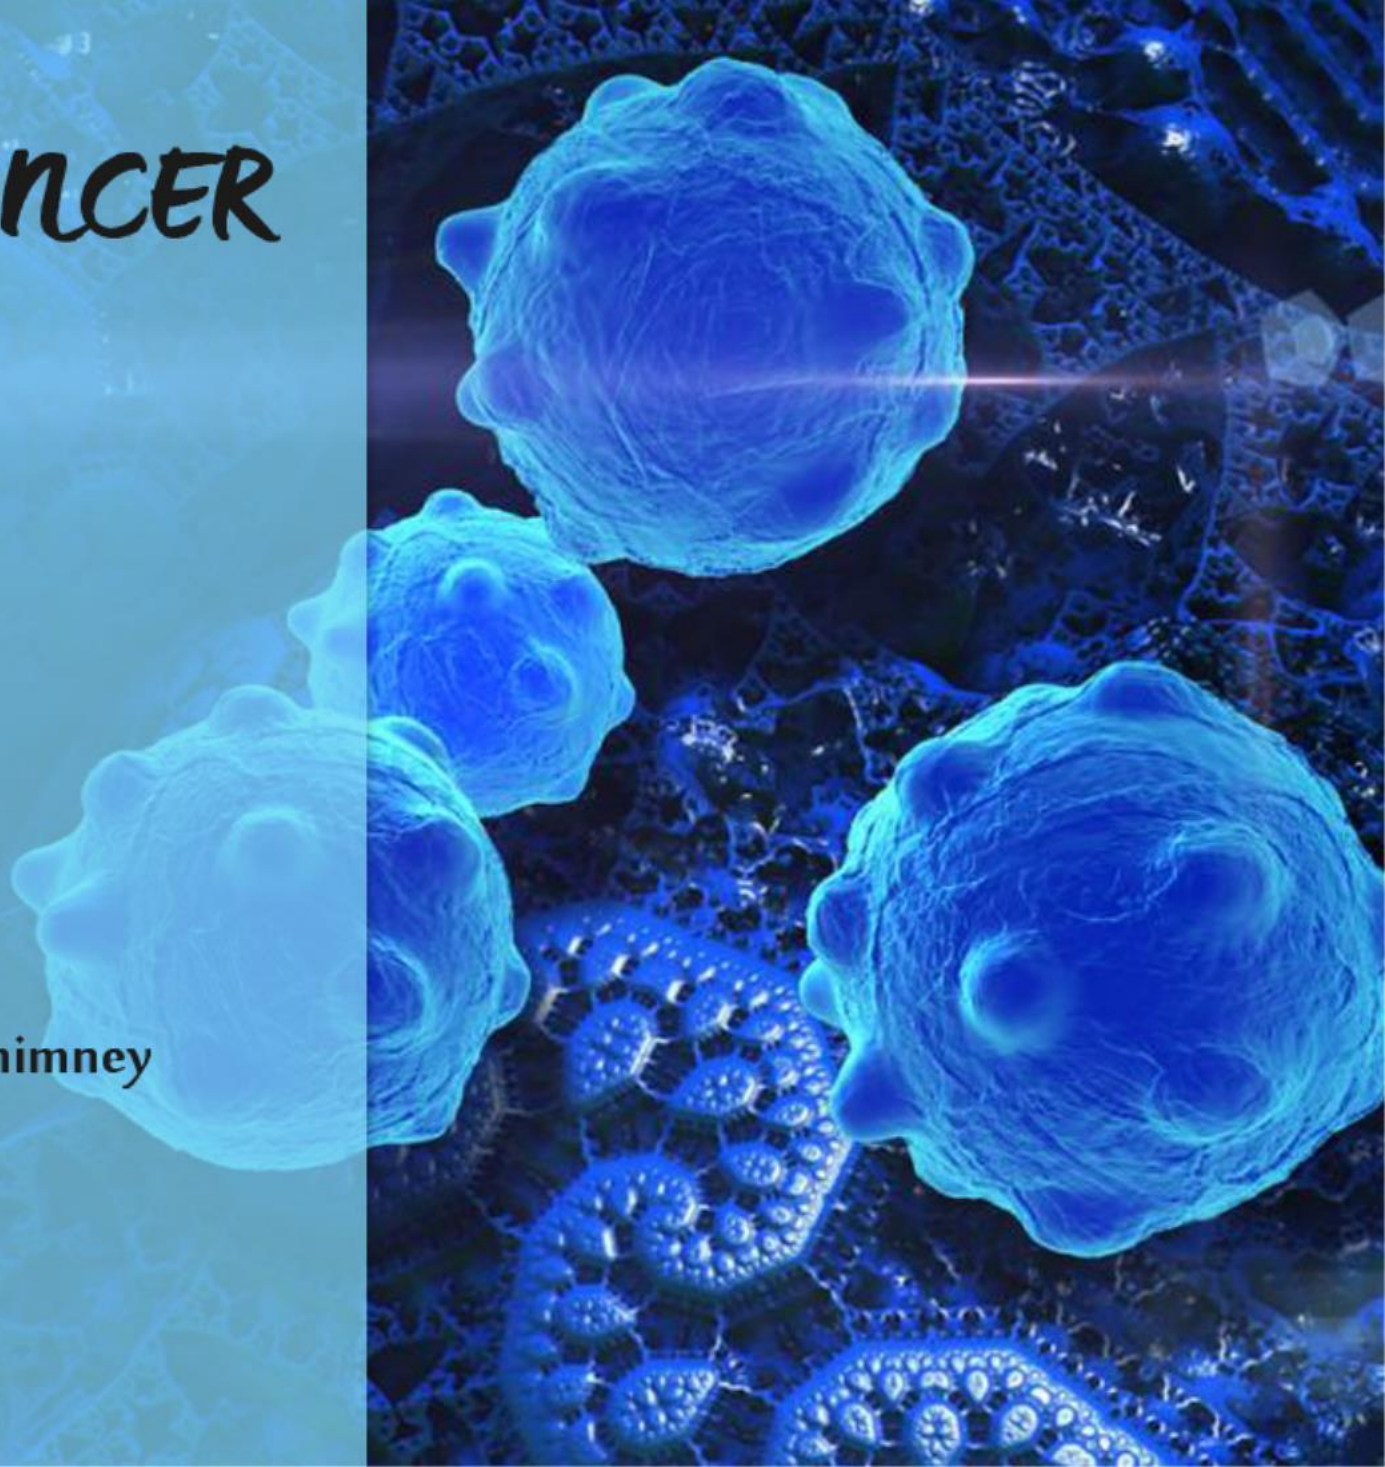

DR. SYED HISHAM AHMED SHIBLI CANCER CONSULTANT – B.U.M.S

Herbal Pharmaceuticals has so far successfully treated Cancer patients suffering from Multiple Myeloma, Sarcoma, Acute Myeloid Leukemia, Acute Lymphoblastic Leukemia, Brain, Stomach, Liver, Breast, Oesophageal, Colon Cancer and Oral Cancer, Some of the past case histories are reproduced here.

Herbal Pharmaceuticals incurs a substantial amount of time and money to procure rare herbs from the interior of Himalayan Range. Herbal Pharmaceuticals ran by Vaid Atiq's elder son Syed K.A. Shibli and Grand Son Dr. Syed Hisham Ahmed Shibli. Both of them are working day and night to make this medicine reach all suffering patients from the dreaded diseases **CANCER**.

CAUSES OF CANCER

- Heredity
- Tobacco smoking
- Spicy diet
- Sunlight
- Viruses
- Chemicals
- Radiation
- Occupational hazards like chimney sweepers
- Hormone-producing tumors

CANCER SYMPTOMS

- A lump, which is often firm or painless, present beneath the skin.
- Non-healing wounds.
- Blood in the urine, sputum or in the vomitus.
- Changes in bowel movements.
- Constant pain in the abdomen.
- Weight loss, which is significant in a short period of time.
- Fatigue
- Loss of appetite.
- Long-standing hoarseness of voice.

CANCER TREATMENT

**Herbal Remedies
for Blood Cancer By
Herbal Pharmaceuticals.**

CAN - 5 Drops

ACTIONS

Normalizes the blood cells formation in leukemia patients and cures several types of leukemia (Blood Cancer)

Swertia chirata

have multifarious therapeutic value. It is used as an antimalarial, a bitter stomachic, anthelmintic and as a remedy for scanty urine, epilepsy, ulcer, bronchial asthma and certain type of mental disorder. Studies on the biological activities of *S. chirata* extract reveal that this bitter plant possesses antioxidant, antidiabetic, antimicrobial, anticholinergic and chemopreventive activity. It contains mangiferin along with various secoiridoid glycosides (i.e. amarogentin, amaroswerin, sweroside and swertiamarin). The secoiridoid glycoside, amarogentin, is reported suppressing COX-2 and also possesses various biological activities such as chemopreventive, antibacterial, anticholinergic and antihepatitis activity.

ALLIUM SATIVUM

the possible therapeutic effects of garlic extract in the treatment of IBD patients showed that it reduced the inflammation by inhibiting cell-mediated T- helper-1 and inflammatory cytokines (TNF-alpha, IL-1alpha, IL-6, IL-8, T-cell IFN-gamma and IL-2) while upregulating IL-10 production.⁹⁻¹⁰

ACACIA CATECHU

Altavilla et al. studied the anti-inflammatory activity of Flavocoxid, a mixed extract containing baicalin and catechin from Acacia catechu that acts as a dual inhibitor of cyclooxygenase (COX) and 5-lipoxygenase (LOX) enzymes and showed that Flavocoxid significantly inhibited COX-2, 5-LOX and inducible nitric oxide (NO) synthase (iNOS) expression in LPS-stimulated peritoneal rat macrophages.¹¹

GLYCYRRHIZA GLABRA

It is one such medicinal plant whose dried roots and stolons form an important component of various Ayurvedic formulations.

There are number of reports of *G. glabra* with anti-inflammatory, anticancer, antihepatotoxic, antimicrobial, antioxidant, anti-genotoxic, hepatoprotective, cytoprotective and cytotoxic activities. Other than these, licorice extract also has antidepressant properties. This antidepressant-like effect of liquorice extract is mediated by increase of brain norepinephrine and dopamine, but not by increase of serotonin.¹²

BRASSICA COMPESTRIS

is rich in indole-3-carbinol, a chemical which boosts DNA repair in cells in vitro^{13,14} and appears to block the growth of cancer cells in vitro. They are also a good source of carotenoids, with broccoli having especially high levels¹⁵. Researchers at the University of California at Berkeley have recently discovered that 3,3'-diindolylmethane in Brassica vegetables is a potent modulator of the innate immune response system with potent antiviral, antibacterial and anticancer activity¹⁶. However, it also is an antiandrogen but is known to be antiandrogenic only in hormone-sensitive prostate cancer cells. ¹⁷

INDICATIONS

Leukemia (Acute/Chronic Myeloid Leukemia, Acute/Chronic Lymphoblastic Leukemia)

COMPOSITION

Swertia chirata 200mg

Allium sativum 200mg

Acacia catechu 100 mg

Glycyrrhiza glabra 100mg

Brassica compestris Q.S. TO 100 ml

DOSAGES

CAN-5 Drops

-One drop (adults) and ½ drop for children up to the age of 12 years should be taken in the morning half-an-hour after the breakfast and after dinner, with the help of dropper one drop is to be poured down in a ½ empty capsule provided with the medicine & this half capsule with drop medicine should be kept inside the mouth and swallowed by a glass of warm water.

YAKRIT PUNARNAVA VATI

– One hour after taking CAN-5 Drops take 2 Tablets twice daily with plain water.

HERBALYA

– Ten minutes after taking Yakrit Punarnava Vati take 2 Tablets twice daily with plain water.

SIDE EFFECTS

It is not known to have any side effects if taken as per the prescribed dosage. 100% vegetarian.

HERBALYA

ACTIONS

General debility

Aphrodisiac

Rejuvenator tonic

Withania somnifera (Ashwagandha)

In today's herbal medicine the herb is categorized as an adaptogen and it used to treat fatigue, nervous exhaustion and to enhance memory. The herb also has a reputation as an aphrodisiac both for men and women and is believed to protect against infertility in men.

Asparagus adscendens (Musli)

Body rejuvenator and a powerful Aphrodisiac, strengthens the body, increases sperm count.

ASTERACANTHA LONGIFOLIA (KOKILAKSHA)

Stimulates male genital system Beneficial in treatment of sexual debility, premature ejaculation, erectile dysfunction/failure Potent remedy for renal stones Have a diuretic property also useful in ailments of the urogenital tract, like dysuria, urinary calculi and cystitis. The seeds are known to increase libido and are beneficial in treating spermatorrhoea.

MUCUNA PRURITA (SHUDH KAUCH BEEJ)

Cowhage has been used in Ayurvedic medicine to elevate sperm count and regularize ovulation in women. The herb is also helpful in normalizing nerve cell functions.

Supports a healthy central & peripheral nervous system

Supports the body's ability to handle stress

Is a natural source of levodopa (L-dopa)

Supports physical balance & posture

Promotes healthy motor skills & coordination

Improves energy & endurance

Supports the intellect

Bolsters libido

Revitalizes both the male & female reproductive systems

Enriches the performance of the nervous system. It is considered an effective nervine tonic. The herb is a prophylactic against oligospermia (low sperm count) and is useful in increasing sperm count and regularizing ovulation in women.

TRIKUT

Trikut is a mixture of three spices in equal proportions 1) Black pepper – *Piper nigrum*, 2) Long pepper fruit – *Piper longum*, 3) Ginger - *Zingiber officinalis*. Trikut is hot in potency, stimulative in nature, good for liver, spleen and pancreas and also stimulates stomach to produce enzymes hence it helps in digestion. It is also good for respiratory system.

RAS SINDOOR

BENEFITS:

It is used to boost immune system, to improve strength, in cardiac diseases, colicky abdominal pain, urinary tract related diseases, fistula in ano, inflammatory conditions, tuberculosis, chronic respiratory conditions, asthma, anemia, obesity, non-healing wounds, and digestive problems.

It is used as general co prescription to improve immunity.

Effect on Tridosha- Balances Vata, Pitta and Kapha.

INDICATIONS

General debility

COMPOSITION

Withania somnifera Ashwagandha - 80 mg

Asparagus adscendens Musli - 80 mg

Asteracantha longifolia Kokilaksha - 80 mg

Mucuna prurita Shudh Kauch Beej - 80 mg

Trikut - 170 mg

Ras Sindoor – 10 mg

DOSAGES

2-2 tablets twice daily with honey or as directed by your physician

SIDE EFFECTS

It is not known to have any side effects if taken as per the prescribed dosage.

100% vegetarian.

YAKRIT PUNARNAVA VATI

ACTIONS

Liver tonic, Appetizer

INDICATIONS

- Jaundice
- Anaemia
- Abdominal ailments
- For the prevention and treatment of viral hepatitis, alcoholic liver disease, pre-cirrhotic conditions and early cirrhosis, anorexia, loss of appetite and liver damage due to radiation therapy
- Liver disorders including fatty liver associated with protein-energy malnutrition
- Jaundice and loss of appetite during pregnancy
- As an adjuvant during prolonged illness and convalescence
- As a adjuvant to hemodialysis
- As an adjuvant to hepatotoxic drugs like anti-tubercular drugs, statins, chemotherapeutic agents and antiretrovirals

KEY INGREDIENTS

Picrorhiza kurroa (KATUKA)

The root contains a number of very bitter glucosides including kitkin and picrorhizin, nine cucurbitacin glycosides, D-mannitol, benetic acid, kutkisterol, vanillic acid and some steroids. Picrorhiza kurroa also contains apocynin, a powerful anti-inflammatory agent, which also reduces platelet aggregation. The actions of the herb are antibacterial, antiperiodic, cathartic (in large doses), laxative (in smaller doses) stomachic and bitter tonic, hepatoprotective, anti-cholestatic (relieves obstruction of bile salts), anti-inflammatory, anti-allergy, antioxidant; modulates the immune system and liver enzyme levels. Picrorhiza kurroa is an important herb in the traditional Chinese and Ayurvedic systems of medicine, used to treat liver and upper respiratory conditions.

Its traditional uses include treatment of a wide range of conditions, including fevers, chronic diarrhea, constipation, dyspepsia and jaundice. It has also shown that the active constituents of picrorhiza kurroa may prevent liver toxicity and the ensuing biochemical changes caused by numerous toxic agents. In other animal studies, picrorhiza raised depleted glutathione levels in rats infected with malaria, boosting detoxification and antioxidation. The herb is thought to be helpful as a remedy for a number of auto-immune diseases such as vitiligo and psoriasis.

TEPHROSIA PURPUREA (SARPUNKHA)

This is known to be an effective herb for the treatment of liver cirrhosis. It helps in the detoxification of liver and also helps in the regeneration of new liver cells. It also helps to provide relief in the symptoms like nose bleeding, weight loss, decreased appetite, jaundice (yellow discoloration), anorexia, itchy skin, weakness, abdominal swelling (ascites) and swelling of the legs (edema). Hence it is an effective herb for the treatment of liver disorders.

Anticancer properties of this herb help in treatment of cancer. This herb helps to stop the growth of cancer cells and increases the growth of healthy cells in a natural way without causing any side effect on health. This is a very effective remedy for enlarged liver. Gas problems are also treated. Reduces acidic levels. Moreover, improves regeneration of liver cells.

EMBLICA OFFICINALIS (AAMLAKI)

This herb rejuvenates, nourishes body tissues and accelerates the cell regeneration process. It is a powerful antioxidant, Emblic Myrobalan helps scavenge free radicals linked to premature aging. It helps in building the body's immune system and provides resistance against many diseases, especially those of the respiratory tract. In Ayurveda this herb is best used to make the equilibrium of three major powers of body (tridoshas) i.e. vata, pitta, kapha.

- Andrographis Paniculata (KAALMEGH)**

- Digestive:Promotes Digestion**

- Hepato protective:** Protects the liver and gall bladder.

- Vermicidal:** Kills intestinal worms & support intestine.

- Anti-acne:** Protect skin from pimples.

- Anti-inflammatory:** Reduces swelling and cuts down exudation from capillaries.

- Antibacterial:** Fights bacterial activity. Although Andrographis appears to have weak direct antibacterial action, it has remarkably beneficial effect in reducing diarrhea and symptoms arising from bacterial infections.

- Expectorant:** Promotes mucus discharge from the respiratory system.

- Hypoglycemic:** Blood sugar reducer. Immune system enhancer.

- Laxative:** Aids bowel elimination

BOERHAVIA DIFFUSA (PUNARNAVA)

Punarnava is extremely good for the liver. It helps stimulate the secretion of bile on a regular basis, which is what keeps the liver healthy and functional.

PHYLLANTHUS NIRURI (BHUMYAMLAKI)

it is a weed found in coastal areas, It's also known as gale of the wind or stone breaker, its leaves and fruit are used as herbal medicine.

Phyllanthus niruri is known for protecting the liver. It may also combat kidney stones, hence the "stonebreaker" moniker. Keep reading to learn more about how this plant may improve your health.

It may improve liver health

According to a 2017 study on rats, phyllanthus niruri may help treat nonalcoholic fatty liver disease and atherosclerosis. Both conditions may cause insulin resistance. The study found phyllanthus niruri decreased insulin resistance and reduced the amount of fatty acids in the liver. A 2006 study on mice also found that the antioxidants in phyllanthus niruri may help protect the liver from acetaminophen toxicity.

It may help treat acute hepatitis B

Phyllanthus niruri may help treat acute hepatitis B infections due to its anti-viral and liver-protecting abilities. In a 2010 study, 60 people with the condition received either a placebo or a product made of seven herbal medicines including 100 milligrams of phyllanthus niruri. The herbal medicine group experienced faster recovery than the placebo group. However, they reported side effects like upper abdominal pain and diarrhea. Phyllanthus niruri may not help chronic hepatitis B, though. A 2011 review of 16 randomized trials on people with chronic hepatitis B didn't find any significant evidence in support of the treatment.

It has antioxidant properties

According to a 2014 in vitro study, an extract made from phyllanthus niruri leaves showed strong antioxidant activity. Antioxidants fight free radicals in the body that may cause cell damage and disease.

It has antimicrobial properties

According to a 2012 study, phyllanthus niruri extract has antimicrobial abilities against H. pylori bacteria. H. pylori bacteria are common in the digestive tract and are usually harmless. But in some cases, they can lead to peptic ulcers, abdominal pain, and nausea. Researchers also found that the extract didn't harm any beneficial strains of lactic acid bacteria.

It has anti-inflammatory properties

Inflammation can cause many problems throughout the body, including skin conditions like psoriasis and chronic pain. According to a 2017 animal study, phyllanthus niruri may help reduce inflammation. For the study, researchers injected carrageenan into the left hind paws of rats to cause inflammation. The rats were then treated with phyllanthus niruri extract, which was found to significantly reduce the inflammation.

It may help protect against ulcers

Findings from the same 2017 animal study also suggest that phyllanthus niruri extract can help prevent ulcers. It's thought to reduce gastric acid secretion and protect the stomach. It also showed potent anti-inflammatory effects against gastric ulcers.

It may help lower blood sugar

Phyllanthus niruri may also have antidiabetic properties. According to a 2011 study, the plant's aerial parts may help prevent glucose absorption and improve glucose storage. This may help maintain blood sugar levels.

It may help prevent kidney stones

Phyllanthus niruri may be best known as a kidney stone remedy. According to 2010 research, many studies have shown that it's a powerful kidney stone deterrent. Phyllanthus niruri can help relax the ureter after lithotripsy to help stones pass. Lithotripsy is a procedure used to break up stones in the urinary tract. It may also prevent stones from forming in the first place by stopping the crystals that form them from clumping together.

It may be anti-cancerous

Phyllanthus niruri and other phyllanthus species may help prevent the metastasis of some lung and breast cancers. A 2011 study showed the polyphenols in the herb help prevent the invasion, migration, and adhesion of cancer cells. A 2012 study on human colorectal and liver cancer cell lines also found that phyllanthus niruri helped slow cancer cell growth and encouraged cancer cell death.

Solanum nigrum (KAKMACHI)

It protects liver and fights against jaundice. It is helpful in enlargement of organs like liver and spleen. Solanum nigrum (Makoi Kakamachi) is useful for the treatment of measles. This is useful for the treatment of ulcer. It is useful for the treatment of cancer. Solanum nigrum / Nightshade is used as a blood purifier. It reduces gas formation in the stomach. Solanum nigrum (Makoi) has also anti-diarrheal and antipyretic property. It also used to treat weakness to get strength and vigour, and diuretic in nature. It has been used for treatment of piles and leprosy. It is used against itching, skin diseases and eczema. Leaf juice cures worm in the stomach and very useful for the treatment of gout.

Eclipta alba (BHRINGRAJ)

The whole plant is used as antiseptic, febrifuge, tonic, deobstruent in hepatic and spleen enlargement and is emetic. Bhringaraj is commonly used as deobstruent to promote bile flow and to protect the liver parenchymatous tissue in viral hepatitis and other conditions involving hepatic enlargement. The fresh juice of the leaves is given in the treatment of edema, fevers, liver disorders, and rheumatic joint pains; it is also used to improve the appetite and to stimulate digestion. The juice is given with honey to treat upper respiratory congestion in children.

COMPOSITION

Each tablet contains

Picrorhiza kurroa KATUKA 60 mg

Tephrosia purpurea SARPUNKHA 50 mg

Emblica officinalis AAMLAKI 60 mg

Andrographis Paniculata KAALMEGH 60 mg

Boerhavia diffusa PUNARNAVA 70 mg

Phyllanthus niruri BHUMYAMLAKI 60 mg

Solanum nigrum KAKMACHI 60 mg

Eclipta alba BHRINGRAJ 80 mg

DOSAGE & DIRECTIONS FOR USE:

2-2- tablets with Luke warm water or as directed by your physician.

SIDE EFFECTS

It is not known to have any side effects if taken as per the prescribed dosage. 100% vegetarian.

GILOKAL

ACTIONS

Guduchi

has an effective effect on a wide range of fever and other infective conditions. Helps increase the effectiveness of protective white blood cells that fight infection. Augments immune responses to infections by influencing various immune effector cells and ensures early recovery

Mustak

Mustak has an effective antimicrobial and antipyretic property and have great effects on digestive disorders.

Tulsi or Tulasi

The Elixir of Life has an antibiotic, antifungal and antioxidant property which promotes good health and supports normal respiratory functions. It also has anticancer, antidiabetic, antifungal, antimicrobial, cardio protective, analgesic, antispasmodic and adaptogenic actions.

Kalmegh

Its Antibacterial and Anti-Inflammatory property fights bacterial activity. Although Andrographis appears to have weak direct antibacterial action, it has remarkably beneficial effect in reducing diarrhea and symptoms arising from bacterial infections.

Digestive: Promotes Digestion

Hepato-protective: Protects the liver and gall bladder.

Vermicide: Kills intestinal worms & support intestine.

Expectorant: Promotes mucus discharge from the respiratory system.

Hypoglycemic: Blood sugar reducer. Immune Enhancement. Laxative: Aids bowel elimination.

Shunthi

it has a very good antipyretic, analgesic, anti-inflammatory & anti-histaminic properties which provides relief in nausea/vomiting, stomach upsets and flatulence.

Latakranj

it is best known as fever nut

Indications

Fever/Puerperal Fever

Anti-infective/Toxic treatment

Infections in the respiratory system, skin and soft tissues

Immune compromised conditions

COMPOSITION

Each tablet contains:

Tinospora cordifolia Guduchi - 100 mg

Cyperus rotundus Mustak - 50 mg

Ocimum sanctum Tulsi - 50 mg

Andrographis paniculata Kalmegh - 25 mg

Zingiber officinale Shunthi – 25 mg

Caesalpinia bonducella Latakranj – q.s.

DOSAGES:

2-2 tablets with luke warm water or as directed by your physician

SIDE EFFECTS:

It is not known to have any side effects if taken as per the prescribed dosage. 100% vegetarian.

Kanthosom (The cough reliever)

ACTIONS

Combats cough for both productive and dry cough.

Mucolytic and expectorant.

Antitussive (cough reliever)

Reduces bronchial mucosal irritation and related bronchospasms.

Anti-allergic, antimicrobial and immune-modifying properties provide relief from cough.

Soothes respiratory passages.

INDICATIONS

- ✓ Cough
- ✓ Rhinitis
- ✓ Asthma
- ✓ Tonsillitis
- ✓ Throat ailments
- ✓ (COPD)

GLYCYRRHIZA GLABRA (YASHTIMADHU) LICORICE

It has antitussive, expectorant and immune-enhancing properties that are helpful in relieving cough. Licorice enhances immunity by boosting levels of interferon, a key immune system chemical that fights off viruses. In the respiratory system, its soothing and healing action reduces irritation and inflammation. Its anti-allergic property is useful in allergic rhinitis, conjunctivitis and bronchial asthma.

TERMINALIA BELLERICA (BIBHITAK)

It has been used as a "health-harmonizer Terminalia bellerica is used to protect the liver and to treat respiratory conditions, including respiratory tract infections, cough, and sore throat. It relieves blocked phlegm & bleeding in sputum. Also useful in hoarseness of voice.

SOLANUM SURATTENSE (KANTKARI)

Useful in cold, cough, bronchitis, asthma, and other respiratory tract conditions, fever relieving, thirst and given in urinary concretions.

PIPER LONGUM (PIPPALI)

Useful herb for cold and mucus conditions of the lungs as it boosts vasodilation and increases circulation to the lungs. It acts like a bronchodilator, decongestant and expectorant and rejuvenates lungs. It prevents from cold.

ZINGIBER OFFICINALE (SHUNTHI)

Useful in diseases associated with respiratory tract and asthma. It is anti-inflammatory in nature which reduces swelling and edema.

PIPER NIGRUM (MARICH)

It detoxifies lungs and kidneys and cleans lymph glands. Cold and Flu Remedy Black pepper and honey is a traditional Ayurvedic approach to respiratory congestion, helping to expectorate and dry up mucus membranes (Frawley, 1986). In Western herbalism, it is used in antiseptic cold and flu preventatives like fire cider.

OCIMUM SANCTUM (TULASI) HOLY BASIL

It possesses potent antihistamine properties, which protect against pollen-induced bronchospasms. Tulasi is used in catarrh (mucous membrane inflammation of the respiratory tract) and bronchitis due to its varied pharmacological usages.

COMPOSITION

Glycyrrhiza glabra Yashtimadhu 125 mg

Terminalia bellerica Bibhitak 125 mg

Solanum surattense Kantkari 100 mg

Piper longum Pippali 50 mg

Zingiber officinale Shunthi 50mg

Piper nigrum Marich 50 mg

Ocimum sanctum Tulasi q.s

DOSAGES

2-2 Tablets twice daily with honey or as directed by your physician.

SIDE EFFECTS

It is not known to have any side effects if taken as per the prescribed dosage. 100% vegetarian.
