About Us

Founded in 1991, Golden Engineering Co. Pvt. Ltd. (GECPL) has progressed and today become one of the quality manufacturers of Textile Machinery, HVLS Fans , High Volume Low Speed Fans, Non-Conventional Energy Systems, Precision Brass Components, Engineering Components and Powerless Turbine Ventilators in India. The promoters of the organization are blessed with four decades of experience in the domain of Engineering with wide technical knowledge in customized manufacturing and development.

The foundation of GECPL lies in recognizing its potential market and meeting the client needs in the most efficient, profitable and ethical manner. Our strength and success in this industry is attributed to our modern operational systems, efficient management, uncompromising quality control and talented workforce, but more importantly it is our desire and vision that has boosted our growth.

We are a group of motivated team of highly skilled and proficient professionals from varying fields which are involved in manufacturing and distributing quality products in different countries.

Manufacturing Facilities

We own a state-of-the-art manufacturing plant, which is the key strength of our company. All the modern facilities like machinery (welding, cutting, frilling etc), tools, safety equipment, fire alarms, material handling equipment etc., that are equipped in our departments helps us in having a trouble free operation one or the other way.

Quality Assurance Process

Being a quality committed organization the sole purpose of our organization is to bring forth goods that are at par with the industrial standards and which satisfies the customers. Every product manufactured in our plant is passed through a rigorous Quality Management System. The testing process helps in finding out the flaws in the product so that if any it can be rectified and then sold to our customers.
