

Kota Blue Limestone

PREMIUM ARCHITECTURAL NATURAL STONE CATALOGUE

MATERIAL PROFILE

Kota Blue Limestone is a prominent natural architectural stone celebrated for its elegant bluish-green palette and uniform fine-grained finish. As featured in high-end exterior paving layouts, this material brings exceptional wear resistance, high structural density, and natural slip resistance (R11 rated). Its low water absorption properties make it ideal for areas exposed to continuous moisture, such as luxury patios, public squares, swimming pool pathways, and residential structural decking.

TECHNICAL SPECIFICATIONS MATRIX

Parameter	Technical Specification Value
Stone Variety	Natural Dolomitic / Oolitic Limestone Matrix
Color Profiles	Soft Blue-Grey base with gentle Olive/Sage accents
Surface Finish Options	Natural Calibrated Split-Face, Honed, and Tumbled Antique

Parameter	Technical Specification Value
Water Absorption	Extremely Low (Highly non-porous structure resistant to frost)
Slip Resistance Index	Excellent natural grip texture surface (R11 equivalent)
Primary Utilities	External patio spaces, courtyard floorings, pool surrounds, and facade cladding
