About Us

We, at Sri Minerals And Hardware, are engaged in the production of a diversified product range, which includes items from hardware to various industrial minerals. We started off with a vision to cement the name of our organization in distinct areas by responsibly serving them with the finest quality of products. By working as a manufacturer, we are bringing a superior quality of items such as Control Panels, Pump And Pump Parts, PU Mat Panels, Wire Meshes, Spray Nozzles and Water Treatment Chemicals. With the consistent supply of these superior grade products, our organization has attained an impressive growth rate in a short period of time.

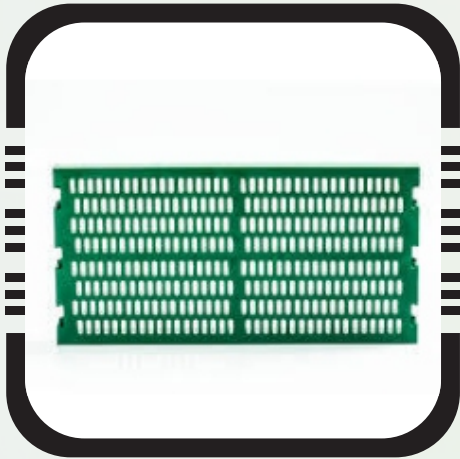

Our offered hardware items are manufactured through finest raw material available in the market. Whereas, our experts ensure that our offered minerals are composed as per industrial terms & conditions. Either ways, our each offered item comes from well-organized production processes and thorough quality test schemes, which makes them highly valuable, easy to rely upon and worth of putting money.

With our servicing of only couple months, our organization has started placing a unique spot in the competitive domain of manufacturing hardware & minerals. By pursuing our mission of fulfilling the expectations of all required customers across the country, we look forward to achieving all worthy success in the domain with time.

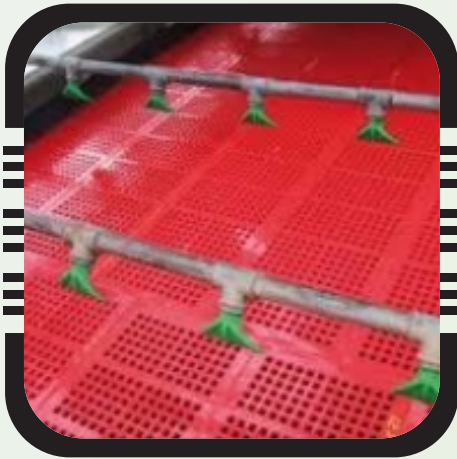

Quality That Matters

Being a quality-focused manufacturer, we aim to always serve our customers with a quality which actually matters. Therefore, our each offered item including Control Panels, Wire Meshes, PU Mat Panels, Spray Nozzles, Water Treatment Chemicals and Pump & Pump Parts is accurately manufactured in compliance to national norms and, precisely tested for their respective performance & other quality attributes. Our quality is not only limited to offered product range but also resides in the associated services such as packaging, shipment, etc.
