About Us

We "Plateroll Industries" seek to notch up Utmost-Customer-Satisfaction, leading us to stretch across wide client base across the country and Asian & African continents. Therefore, we are one of the most dependable Exporters, Manufacturers, Wholesalers/Distributors, Suppliers and Traders of Plate Bending Machine. Since our inception in the year 1967, we have been toiling away to be a groundbreaking innovator in design and development of Bending Machines. The great legacy of experience and expertise is behind us, so we are marked down to be an eminent name in the industry and having come up as an indomitable player.

Our fervent belief is to offer high-test machines along with congenial client relation and our unparalleled solutions appreciated in Indian Continent as well as different parts of the world. We have made a strong hold in international markets where we export over 30% of our batch of machines, designed in different topologies. Besides, we also custom-make product and services for heavy bending works. At Plateroll Industries, development of skill and production mechanism through the implementation of cutting-edge technology preponderate.

We are an emulous exporter, manufacturer, wholesaler/distributor, supplier and trading company of Roll Plate Bending Machine, Heavy Duty Plate Bending Machine, In Howrah (West Bengal, India), we are operating for more than 45 years. During this tenure, we have acquired credibility in supplying precision designed Plate Bending Machine in Howrah. Characterized with standard worktable length and nominal pressure, our Plate Bending Machines is highly demanded all around. These machines are made of forged steel & are integrated with separate control panel. Further, these are attributed with minimal frictional resistance, and high torque limit.
