NN-100 SANITARY NAPKIN INCINERATOR

About Us

A year ago, we, Doha Systems forayed in the markets as a manufacturer of a wide gamut of machines. When our range was introduced for the first time, we received great feedback from customers. They noticed that our brand was superior and our products were way better than the ones that they procured from their previous partners. Today, our expertise covers fabricating a wide line of machines that comprises high-end USM-300 Sanitary Napkin Incinerator, Manual Sanitary Napkin Vending Machine, STDN-800 Sanitary Napkin Incinerator, etc. These machines are made from premium grade raw material which are responsible for their long service life. Our array requires low maintenance and exhibits features such as fluent performance and less power consumption. This world-class gamut is offered to customers by our company at market leading rates. Customers all over India consider us as the most reliable partner that embrace values based on morality. We are always honest towards that and keep all the promises made to customers. Our team treats customers with high respect and works hard to build long term relations with them.

The components we procure from vendors are tested at our premises before the manufacturing process. We know that use of high grade raw material and components is crucial to the production process of high grade machines. By the support of modern technology, we prepare a flawless gamut and the whole production process is supervised by an expert team. Later, to be sure about the features and functions of machines, we make them go through a final stage testing that takes place at our quality control wing. Here all the machines are checked properly on different parameters. Only after the approval of quality experts, the assortment is packed and delivered to customers.

Key Facts

Nature of Business	Manufacturer
Primary Competitive Advantages	vending machines and incinerators,
No of Staff	10
Year of Establishment	2018
OEM Service Provided	Yes
Memberships	MSME
ProductRange	vending machines and incinerators,
