

P-301R Portable Sand Blasting Machine

The P-301R Portable Sand Blasting Machine is a compact and efficient abrasive blasting system designed for surface preparation, rust removal, paint stripping, cleaning, and finishing applications. Its portable design allows easy movement and operation in workshops and industrial sites.

Features

- Portable and compact design
- Heavy-duty steel construction
- Efficient abrasive blasting performance
- Easy operation and maintenance
- Corrosion-resistant finish
- Suitable for multiple abrasive media
- Industrial-grade safety features

Technical Specifications

Specification	Details
Model	P-301R
Type	Portable Sand Blasting Machine
Capacity	30 Liters
Working Pressure	6-8 bar (87-116 psi)
Air Consumption	8-10 CFM
Blasting Hose	1/2 inch (13 mm)
Nozzle Size	4, 6, 8 mm
Abrasive Media	Sand, Garnet, Steel Grit
Construction	Heavy-duty Mild Steel
Mobility	Portable Wheel Mounted
Applications	Rust Removal, Paint Stripping, Surface Preparation
