About Us

PVC is a polymer of vinyl chloride and is extensively used as a thermoplastic polymer in various industry applications. It is highly durable and can be easily assembled which makes it apt for various purposes. PVC can be found in pipes, electric wires, hoses, tubes etc. PVC pipes are immensely used in PVC products. Light weight, low reactivity and high strength are some factors that are suitable for industry applications. Besides, PVC pipes find usage in sanitation, plumbing, irrigation, agriculture etc.

Founded in **2003**, **Krishna Polymers** is a progressive name in the arena of **PVC products**. We are a distinguished **exporter, manufacturer and supplier** of various plastic products like **PVC Pipe, PVC Poultry Water Pipe, PVC Poultry Feed Channel Pipe, Water Channel Pipe, Water Supply Pipe, Pvc Square Pipe, Plumbing Pipes, Agricultural Pipes**, and many other products.

By following hard core professionalism in every aspect of our operations, we aim to provide our valued clients with the greatest value in terms of product quality, reliability and service. Our uncompromising endeavor to quality and perfection has helped us to win the trust, confidence and support of innumerable clients spread at every corner of India.

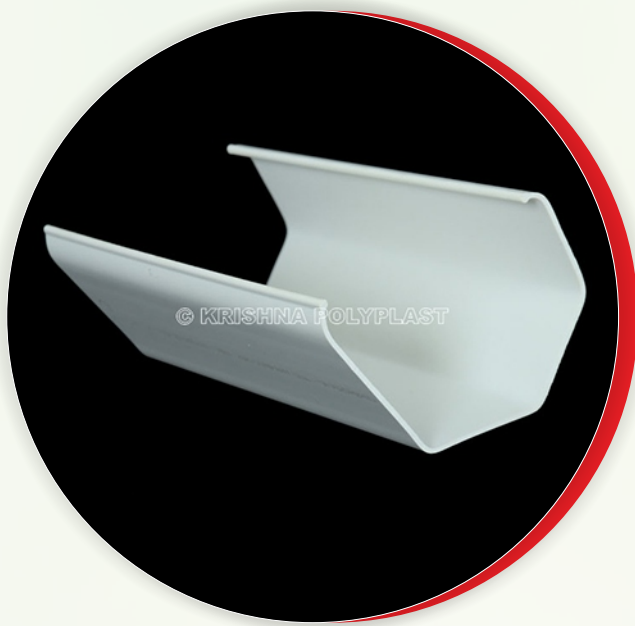

We take pride in being a member of various eminent business organization and associations like The Gujarat State Plastic Manufacturers Association (GSPMA), Indian Poultry Equipment Manufactures' Association (IPEMA) and The Automation Industry Association of India (AIA).
Our Business Objectives

Impeccable Quality

We strictly comply with all the quality control standards and norms throughout the processes to guarantee optimum product quality. Our expert professionals supervise all the stages closely to eliminate chances of flaws. Besides, best grade PVC resins are used in the production process so as to manufacture non-toxic, durable and high quality products. Use of modern inspection machines and equipment enables us to test our finished products on various physical and chemical parameters.

Our quality inspectors conduct lab testing process as per the standard norms thereby allowing the dispatch of only best grade products. Furthermore, all the finished items are securely packed, labelled and stored in our well managed warehousing facility.

Our Products

PVC Layer Feeder Small
