About Us

Gold and silver are mostly preferred in their purest forms. This leads to the fact that they require smelting and refining as it is only these two reliable processes that with pressure, chemicals and heat removes various impurities and make gold and silver the valuable metals of the age. With the growing need for pure gold, silver coins, authentic metal jewellery and metal bars in the global marketplace, rising is the importance of prompt and smooth metal refining. Taking a strong step ahead in meeting such emerging needs is **Jeweltech Jewel Equipments**, which is a reputable firm serving as a **manufacturer** and **exporter** of **Refining Machines, mainly Automatic Gold Refining Machine and Automatic Silver Refining Machine**. Process requirements of silver and gold processing companies are taken into account while designing and developing these aforesaid machines. It is with our focus over users wants that we create 100% user-friendly machines in many standard dimensions and capacities.

Nationally Famed, Internationally Acclaimed

Gaining an edge in the challenging marketplace becomes difficult for those companies that fail to prioritize quality for pleasing customers. For our company, delighting customers has never been a problem because right from the beginning, our focus is over quality production. In fact, it is the result of maintaining top quality standards in production that we have become a nationally famed and internationally acclaimed business unit. In 16 years of our industrial presence, we have increased our network of supplying Automatic Silver Refining Machine and Automatic Gold Refining Machine, from local Indian markets to International markets of **South Africa, UAE, Thailand, USA, Tanzania, Dubai and Malaysia**.

Constant Research For Better Development

Jeweltech Jewel Equipments believes in continuous improvement in production of refining machines so as to attain the position of a leader in the industry. Our growth in the production and supplying of machines is the result of the support of our experts appointed at our R&D department. We have the smartest professionals having deep insight of the industry who look for better techniques as well as technologies to come up with modern ways of boosting development of our machines.
