# **Plastic-Bond**

#### excellent adhesion on plastics high strength shock and impact resistant

WEICON Plastic-Bond is a solvent-free structural adhesive with very good adhesion to plastics, aluminum, steel and much more. The adhesive is suitable for static as well as dynamic loads, has a high impact and peel strength and a maximum gap filling capacity of 5 mm

Plastic-Bond is particularly suitable for structural bondings where high strength connections are required. It has a high viscosity and is suitable for processing on vertical surfaces.

The structural adhesive is universally applicable and can be used, for example, in plastics technology, in metal construction, in car body and vehicle construction, in mechanical engineering, in electrical engineering, in wood processing or in construction works at exhibitions.

#### Surface pre-treatment

The prerequisite for perfect adhesion are clean and dry surfaces (e.g. cleaning and degreasing with WEICON Surface Cleaner). The best results are achieved when the surfaces to be bonded are mechanically roughened. The adhesive is applied only on one side.

#### **Processing**

Plastic-Bond can be processed directly from the double cartridge. Reject the first centimetre of the dosed bead. Mix the product thoroughly. Apply adhesive mixture quickly to only one of the surfaces to be bonded. Join both surfaces immediately afterwards.

#### Storage

The shelf life is 12 months when stored unopened at a normal climate (+23°C and 50 % rel. humidity).
