About Us

National Electric Co., is a company that has emerged as a pioneer in the industry by strictly focusing on innovation. Dealing in a wide range of Electromagnetic Hammers that are maintenance free and deliver superior performance compared to other conventional hammering systems, the company is known for its customer-centric approach that strives the specific requirements of clients. The Electromagnetic Hammers aid in preventing clogging and adhesion of powdery and granular materials within Spray Dryers, Cyclone, Hoppers, BINS, Powder conveying ducts, etc. The use of precision crafted components and high quality raw materials helps ensure that superior build quality is achieved. Tested along various quality parameters, the hammers comply with international standards and are offered to customers at prices that offer the best value for their money. Today, the company has become known as a leading Manufacturer and Supplier of Electromagnetic Hammers and the products offered by it are being used by renowned organizations in diverse sectors and have become known for their unrivaled build quality.

National Electric Co. is recognized as a trustworthy manufacturer and supplier of Electromagnetic Hammer for over 30 years. We are a team of engineers, with over 30 years of rich experience in the areas of designing and operations of various industries including Dairy, Pharmaceuticals, and Dyestuff. Our highly experienced and proficient employees are always geared to provide advice on the specific requirements as well as applications of Electromagnetic Hammers, Acoustic Horn, Sonic Acoustic Horns. We are offering a complete range of Heavy-Duty Industrial Vibrators and Bulk Material Flow Aid Systems. Precision engineered and perfectly designed to handle dry bulk materials, these systems are used to eliminate issues linked with the bin discharging like, bridging, sticking, rat holing and arching, as well as feeding, conveying, screening bulk material in all types of hoppers, bins, silos, chutes, pipes as well as large storage vessels.
