About Us

Being a leader in dehumidification, we are global solution provider for plastics drying, conveying, blending & mould dehumidification, dehumidification and drying, high temperature waste heat recovery and energy smart cooling by using waste heat, with ancillaries in Malaysia, Brazil, Nigeria, China and Switzerland, and an associate plant in the USA. As an ISO 9001:2015 and ISO 14001:2015 certified company, we are supported by strong computerized 3D designing, CNC fabrication, R&D & testing, powder coating facilities and automated conveying system. Our R&D center is recognized by the department of Science and Technology and is undoubtedly one of the trustworthy in the industry. The centre is constantly engaged in latest product development in desiccant based and fluted media technologies. We have many international patents and several of them have been granted. Other than that, we are specializes in manufacturing and designing desiccant based engineered dehumidification systems capable of handling various applications such as lithium-battery, pharmaceutical, food processing, semiconductor, electronic industry, turbine storage, cold storage etc.
