About Us

It is important to install reliable control panels and regulators in all the big companies, factories, banks and many other buildings in order to have control of numerous mechanical operations of industrial equipment or machinery. DJ Power Solutions was started to offer the best quality range of industrial panels and regulators that are expertly developed using the latest techniques. Established in 2016, we are an Andhra Pradesh-based manufacturer and supplier of Motor Control Panel, AMF Electrical Panel, LDB Panel, Automatic Voltage Regulator and many other products. We are working as a sole proprietorship firm and famous in the market for offering top grade products. These panels and regulators provide complete autonomy to the operators ensuring safety for the building. The range is developed according to specific requirements of customers. In addition, we provide solutions for Electrical Transformer Work.

Over the years, we have helped numerous clients by meeting their bulk demands for superior panels and allied products. To fulfill the large demands and assist in producing the products that meet the demands of our customers, our group of engineers and talented workers use their skills and knowledge. We provide them with training sessions from time to time to ensure that they gain knowledge and attain growth in career.
