

# Coloured Fibre Cement Roofing Sheets

Charminar's coloured fibre cement roofing sheets are manufactured using special painting technology. The superior paint coating absorbs harmful UV rays and provides a comfortable working environment by reducing the internal temperature of your house. Compared to metal sheets, corrugated cement sheets help control the temperature during summer and ensure low or no noise during heavy rainfall. These sheets are durable, easy to install, fire resistant and an ideal roofing solution to meet your home's aesthetic needs for years to come.

Heat Resistant

Waterproof

Anti-Algae

Ultraviolet (UV)  
Protection

Sound Resistant

Available in multiple  
lengths and colours

## Technical Specifications:

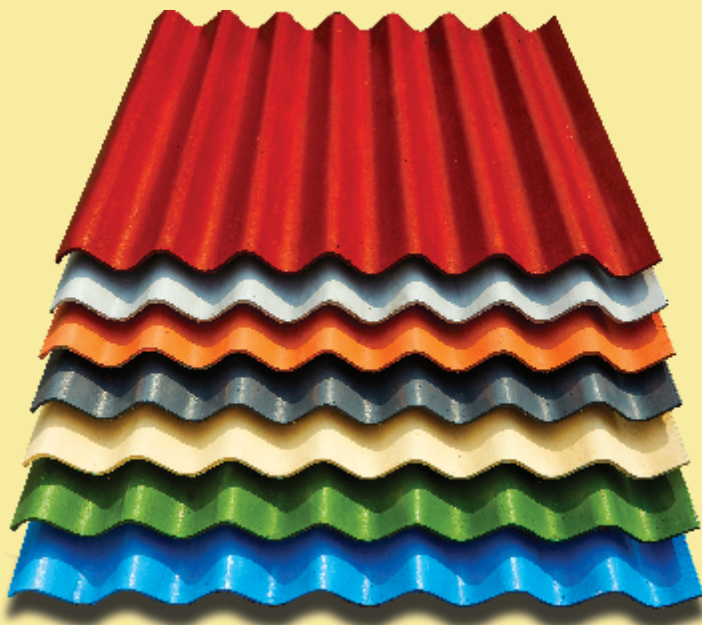

No.	Parameter	Specifications
1.	Thickness	6 mm
2.	Width	1050 mm
3.	Length	1.50, 1.75, 2, 2.25, 2.50, 2.75, 3, 3.6 Mtr.
4.	Load Capacity	5243 N/m <sup>2</sup>
5.	Weight	12.69 kg/m
6.	Depth of Corrugation	48 mm (+3 mm -5 mm)
7.	Pitch	146 (+6 mm -2 mm)

## Applications:

Home, Factory, Bus Stop, Warehouse, Grain Godown, Shops, Parking, Animal Husbandry, Poultry Farm, etc.
