

SOLVENT RECOVERY

Desolventizer Toaster, Electrical Control Panel, Hydrocyclone Separator, Meal Drier Cooler, Solvent Distillation, Solvent Extractor, Solvent Recovery, etc.

MEAL DRIER COOLER

HYDROCYCLONE SEPARATOR

DESOLVENTIZER TOASTER

About Us

Our organization, Balaji Engineering is a leading manufacturer and supplier committed to providing innovative solutions to meet the wide range of industrial requirements. Our offered range includes Hydrocyclone Separator, Solvent Distillation, Meal Drier Cooler, Control Panel, Solvent Recovery, and more. Providing all the highly advanced equipment and systems, we operate within an industry that requires precision and reliability in its production processes. We pride ourselves in high-performance system designs and implementation according to stringent requirements within the given industry.

We have solutions for chemical processing, food manufacturing, pharmaceutical, and other areas. We primarily produce products that make customers improve the efficiency of production, ensure a better operation system, and establish sustainability. Based on cutting-edge technologies and the best practices in the industry, we deliver equipment enabling continuous optimization of separation, distillation, cooling, and recovery processes.

Quality, customer satisfaction, and innovation are what lies at the root of our working. The operation is supported by a group of experienced engineers in close consultation with clients who grasp their exact need and design it as custom-specific, cost-effective, and dependable. We are committed to building long-term partnerships, offering not only superior products but also outstanding support throughout the entire product lifecycle. Select us as a trusted business partner in industrial equipment and discover excellence in all aspects of service and delivery.

Key Facts

Year of Establishment	1990
OEM Service Provided	No

Our Products

Solvent Distillation

Electrical Control Panel

Solvent Extractor

Solvent Recovery
