Repairing And Maintenance

FIRE ALARM SYSTEMS

One area many installers avoid is the annual fire alarm system inspection. Legal necessities mandate annual inspections of fire alarm systems in a variety of facilities. In some jurisdictions, this may be performed by the owner's staff, but the technicalities and liabilities indicate that a thoroughly professional evaluation, test and certification of the fire alarm system are necessary actions.

FIRE FIGHTING

A sprinklers system is effective and user friendly system and has 97% success rate. It is used in commercial building, warehouses, hospitals and places which can accommodate more than 100 people at a time and mainly where the owners avoid maximum damages to their property. For sprinkler system automatic system preference is given, hence in sprinkler system operation, minimum amount of manpower is required and is easily operable; design of the sprinkler system is done according to the NBC standard.

We also provide safety equipment's, pumps and electrical panel for Main and jockey pumps.

FIRE DOORS

We are the distributor of **Electrogroups India**. **Electrogroups India** is the manufacturer of fire door. We have many varieties of fire door like metal, glass, wooden Fire door all Fire doors are tested and certified by C.B.R.I (IS 3614:2021 / IS 16947:2018).2 hours fire proof fire doors.
