

Husk & Shell Sample Analysis Report

Four-Angle Multi-Perspective Visual Capture (Organic Shell / Seed Husk Matrix)

VISUAL DOCUMENTATION

The quad-angle composite grid below details the morphological characteristics, cup-shaped husk formation, pile density, and scattering pattern of the organic sample.

PHYSICAL SPECIFICATIONS & PARAMETERS

Capture Layout	Quad-Angle Composite Grid (2×2 Matrix)
Resolution Format	1000 × 1000 pixels standard frame
Material Type	Processed seed husk / organic hull aggregate
Quality Metrics	Shell uniformity, curvature integrity, and debris-free purity
