Carpet tiles are available in a huge range of colors and designs.

The way you deploy it in your design can affect the look, feel and sound of a space. The colors and patterns of carpet tiles can convey your unique ambiance.

FIBRE USED IN CARPET TILES AND FABRIC CONSTRUCTION

Nylon thread is used which is known for its durability, resilience and comfort. It is static free, maintains fiber height, and does a great job of resisting staining. All of which makes it a popular choice.

Nylon tends to have a glossier, sharper appearance.

Loop pile carpeting is achieved through looping yarns, to bring about a soft, smooth look and feel. In loop pile solutions, higher and lower loops can be combined to play with texture and pattern.

DESIGN FLEXIBILITY

One of the great advantages of carpet tiles is the design flexibility they provide. Tiles can be laid in different arrangements to create subtle patterning, or you can introduce accent tiles to create layouts that can't be replicated with other flooring types.

LESS WASTE

Carpet tiles generate minimal waste in the fitting stage. This is because very little cutting, or adjustment, is needed for tiles to fit a given space. This is particularly true of rooms with many nooks and odd angles.

Carpet tiles are ideal for creating stylish schemes in corporate offices, guest room, corridors, homes, etc. :

OTHER ADVANTAGES:

Easy to install.

Easy to transport.

Easy to lay on top of laminate/vinyl/Concrete with no need for underlay.

Easy to fit in awkward shaped rooms.

Easy to clean and if a tile is damaged, you can simply replace the tile rather than the whole floor.

SPECIFICATION

Construction - Multi level scroll

Yarn - 100% Nylon

Machine Gauge - 1/12"

Pile height - 3-5mm

Total height - 7-8mm

Pile weight - 350-400 gsm/ m²

Total weight - 2500 gsm/m²

Primary backing - Spun bond polyester

Secondary backing - Felt

Size of the tile - 60 cm x 60 cm

Number of tile per box - 12 pcs

Antistatic properties - Permanently Antistatic.

Modular carpet tiles can be installed in many configurations to suit your project and design objectives that can't be achieved with broadloom carpet. Essentially, you can either rotate tiles or offset them to create patterns.

The ability to get creative is endless.

Some of the installation methods are also shown here.
