

SS Mixing Vessel With Agitator

Product Description

The SS Mixing Vessel With Agitator is a high-quality industrial solution designed specifically for chemical and oil applications. Constructed from durable stainless steel, this vessel ensures long-lasting performance and resistance to chemical reactions, making it ideal for demanding environments. Available in a sleek silver finish, the vessel is built to deliver efficiency and reliability in mixing processes. With a spacious capacity of 100–500 liters, it caters to diverse industrial needs, offering flexibility for varying batch sizes. The in-built agitator ensures uniform mixing and homogeneity, maintaining precision in chemical formulations or oil blending. Manufactured under stringent quality standards, this vessel is designed in a completely new condition, guaranteeing exceptional functionality and aesthetics. It is the perfect blend of advanced engineering and functional design for businesses requiring robust industrial mixing equipment.

Frequently Asked Questions (FAQs)

Q: What industries can use the SS Mixing Vessel With Agitator?

A: This vessel is ideal for chemical and oil industries.

Q: What is the material used in constructing this mixing vessel?

A: The vessel is made from high-grade stainless steel (SS).

Q: What is the capacity range of this mixing vessel?

A: The vessel has a capacity of 100–500 liters.

Q: Does the vessel come with an agitator?

A: Yes, it is equipped with an agitator for efficient mixing.

Q: In what condition is the vessel available?

A: The vessel is available in brand-new condition.
