Telecom Quality Management System (TL 9000)

TL 9000 defines quality management system requirements for the design, development, production, delivery, installation and maintenance of telecom products and services while also providing a measurement system that allows companies to track performance and improve results.

Royal Impact Certification limited

ISO 9001:2015

ISO 9001:2015 is an international standard dedicated to Quality Management Systems (QMS). It outlines a framework for improving quality and a vocabulary of understanding for any organization looking to provide products and services that consistently meet the requirements and expectations of customers and other relevant interested parties in the most efficient manner possible.

The QMS is the aggregate of all the processes, resources, assets, and cultural values that support the goal of customer satisfaction and organizational efficiency. First published in 1987, the latest iteration (ISO 9001:2015) replaces ISO 9001:2008.

ISO 14001:2015

All ISO standards are reviewed and revised regularly to make sure they remain relevant to the marketplace. ISO 14001:2015 fully complies with the latest trends, including the increasing responsibility companies of the need to factor in both external and internal elements that influence their environmental impacts, such as climate volatility and the competitive context in which they work. The changes also ensure that the standard is compatible with other management system standards.

- Environmental management system placement within the organization's strategic direction
- A greater commitment from leadership
- The implementation of proactive initiatives protect the environment from harm and degradation, such as sustainable resource use and climate change mitigation
- A focus on the cycle working to ensure consideration of environmental aspects from design through to end-of-life
- The addition of a stakeholder focused communication strategy

ISO 27001:2013

ISO/IEC 27001 is an international standard on how to manage information security. It details requirements for establishing, implementing, maintaining, operating, monitoring, maintaining, and improving an ISMS that is fit for purpose as to help organizations reduce the information assets they face from security.

An Information Security Management System is a set of controls a company needs to establish:

- Identify objectives and their expectations of the company in terms of information security
- Identify risks, risks and their information
- Define controls (safeguards and other mitigation methods) to manage the identified risks and their information
- Monitor, measure or audit needs to be achieved with information security
- Implement all the controls and their mitigation methods
- Continuously measure if the implemented controls perform as expected
- Make continuous improvement to make the whole ISMS effective

IATF 16949

IATF 16949:2016 is the International Standard for Automotive Quality Management Systems. IATF 16949 emphasizes the development of a process oriented quality management system that provides for continuous improvement, defect prevention, and reduction of variation and waste in the supply chain. The goal is to meet customer requirements efficiently and effectively.

The standard applies to any organization that manufactures components, assemblies, and parts for supply to the automotive industry. In the context, manufacturing is defined as:

The process of making or fabricating production materials, production or service parts, assemblies or final treatment, welding, painting, plating, or other finishing services.

CE Marking

CE marking is the product manufacturer's claim that a product meets the essential requirements of all relevant European directives or regulations. These directives or regulations outline the safety and performance requirements for certain products that are placed on the market in the European Union (EU).

There are two main benefits **CE marking** brings to businesses and consumers within the EEA:

- Businesses know that products bearing the **CE marking** can be sold in the EEA without restrictions.
- Consumers enjoy the same level of health, safety, and environmental protection throughout the entire EEA.
