About Us

An ISO 9001:2000 Company, Associated Scientific & Engineering Works (ASEW), offers a wide gamut of premium quality Material Testing Instruments that are used by engineers, technicians, geologists, agronomists, educational institutions, contractors and other concerned for testing and analysis of Soil, Concrete, Cement, Aggregate, Bitumen, etc. Incepted in 1975, the company uses the latest technical developments as well as their years of expertise and experience in the field to manufacture products that confirm to both Internationals and ISS/ BSS standards.

Associated Scientific & Engineering Works is a well-established and reputed name in the domestic market which is manufacturing Vacuum Equipment & System, Infrared Thermometer, Viscometer Bath, Auger Head, Muffle Furnace, Benkelman Beam Apparatus, etc. All these testing & measuring instruments are produced using finest materials which are sourced from reliable vendors. The whole range is developed under the supervision of the experts who ensure that high quality standards are followed at all the stages of production. Over the years, we have earned huge respect & trust of the clients through our ethical business practices. We have been catering to the requirements of various clients for the past many years.

Key Facts

Nature of Business	Manufacturer
Primary Competitive Advantages	geotechnical engineering,civil engineering lab equipment
No of Staff	20
Year of Establishment	1975
OEM Service Provided	No
ProductRange	geotechnical engineering,civil engineering lab equipment

Our Products

Relative Density

Jaw Crushers & Lab Pulverizers

Riffle Sample Divider

Abrasion Strength Testing Machine

Centrifuge Extractor

Bitumen Testing Instruments

Automatic Compactor

Marshall Stability Tester

Viscometers

Cement Autoclave

Mortar Mixer

Concrete Mixer

Ductility Testing Machine

Specific Gravity Testing Machine

Aggregate Impact & Deval Abrasion Testing

Aggregate Impact
