

250x4.8mm Nylon Cable Ties

Experience reliable organization with our 250x4.8mm Nylon Cable Ties, engineered for efficient bundling and securing of cables. Manufactured from Nylon 66, these cable ties provide excellent versatility for indoor and outdoor applications. The self-locking head enables quick installation, while UV resistance and flame-retardant UL 94V-2 certification support safe and durable performance. RoHS compliance, smooth surface finish, customization options, and robust tensile strength of approximately 22 kgf make them suitable for a wide range of applications.

Application and Usage of 250x4.8mm Nylon Cable Ties

Installation is simple: insert the tail through the self-locking head and pull to secure the bundle firmly. These cable ties are ideal for bundling wires, fastening materials, and organizing electrical or networking systems. They are suitable for homes, offices, workshops, data centers, industrial facilities, DIY projects, and outdoor installations. Their UV and flame resistance contributes to dependable long-term performance in demanding environments.

Sample Availability and Export Market Details

Samples are available for quality assessment before placing a purchase order. We serve export markets across Europe, the Middle East, Asia, and Africa. Orders are carefully packaged for safe transit and efficient delivery. Standard packaging options are available, with customized packing offered upon request. This ensures convenient and reliable domestic and international order fulfillment.

FAQs of 250x4.8mm Nylon Cable Ties

Q: How do I install the 250x4.8mm Nylon Cable Ties?

A: Installation is straightforward. Insert the tail through the self-locking head and pull until the bundle is securely fastened, helping prevent slippage.

Q: What are the main benefits of using these cable ties?

A: They provide labor-saving installation, strong bundling performance, UV and flame resistance, and RoHS compliance, making them suitable for diverse applications.

Q: Where can these nylon cable ties be used?

A: They can be used indoors and outdoors in homes, offices, workshops, industrial facilities, data centers, electrical installations, and networking setups.

Q: What finishes and customization options are available?

A: The cable ties have a smooth surface finish and are available in natural/white or black. Custom sizes and packaging can be arranged upon request.

Q: When can I get sample cable ties before placing a full order?

A: Samples can be requested for quality and suitability evaluation before placing a full purchase order.

Q: What is the process for export order completion and packaging?

A: After receiving the purchase order, production and quality checks are completed, followed by high-standard packaging and efficient preparation for domestic or international shipment.
