

Digital Diesel Fuel dispensing Unit

Automatic shut Off Nozzle

Mechanical Diesel Fuel dispensing Unit

Introduction

Diesel Fuel Dispensing Unit is used to dispense diesel. Both AC & DV versions are available. Suitable for both movable application or permanently installed use, perfect for home, business and commercial use.

Features

- Self-Priming
- Low voltage start
- Low voltage start
- Capable of continuous work
- Transfer up to 60 L per minute
- Pump set with liter counter
- Sensitive switch for precise control

Specifications

| Model | AC Fuel Dispensing Unit | DC Fuel dispensing Unit |
|----------------|--------------------------|----------------------------|
| Flow Rate | 20L-60L/min | 20L-40L/min |
| Max. Pressure | 3Bar | 3 Bar |
| Power | AC220V±10%50Hz | DC 12V |
| Bypass Valve | Yes | Yes |
| Inlet & outlet | In BSP 1" & Out NPT 1" | In BSP 3/4" & Out NP T3/4" |
| Power | 375 W | 120 W |
| Nozzle | 3/4", Automatic shut Off | 3/4", Automatic shut Off |
| Hose Pipe | 1", 4 mtr. | 1", 4 mtr. |

AC Pump 220 V AC; 20 to 60 LPM

1" Hose Pipe

DC Pump 12 V DC, 20 40 LPM
