

COBALT SULPHATE

Our service, your satisfaction.

Acacia Catechu Extract, Acacia Tannin Chemicals, Calcium Iodate, Cobalt Carbonate, Cobalt Sulphate, Copper Sulphate, Cutch (Catechu) Extract Tannin, Dried Ferrous Sulphate, Ferrous Sulphate Heptahydrate, Ferrous Sulphate Monohydrate, Leather Chemicals, Leather Tanning Agent, Magnesium Sulphate Anhydrous, Magnesium Sulphate Monohydrate, Manganese Oxide, etc.

ZINC SULPHATE MONOHYDRATE

ACACIA CATECHU EXTRACT

**CUTCH (CATECHU) EXTRACT
TANNIN**

About Us

We are a professional agricultural chemicals manufacturer, exporter and supplier from India. In addition, we are also offering a range of feed grade material/Poultry Feed Supplements, and Leather Chemicals. Since our establishment in 1985, we have surpassed many competitors and acquired a huge market share. The entire range comprises Herbal Extracts like Acacia Catechu; Cutch (Catechu) Extract like Acacia Cutch Extract, Cutch (Catechu) Extract Tannin, Catechu Tannin, Cobalt Sulphate Powder, Zinc Sulphate, Manganese Sulphate Powder etc. All the products are processed in our modern infrastructure, which is state-of-the-art and is equipped with efficacious machinery. The availability of latest and branded machinery has increased the manufacturing capacity to 200 metric tons. The manufacturing processes are done by trained professionals, who are jack of all trades in their domain of work. About 60% of quality Cutch Extract and other products is exported to Gulf, Egypt, USA, Europe, and Middle East. The natural cutch extract is used to treat digestive disorders and stop diarrhea. Rich in tannic, this herbal astringent checks discharges, bleeding, and surplus mucus. It has standard parameters of bulk density, extract ratio, heavy metal, loss on drying, and odor. The rich quality of our products, ethical value systems and efficient business practices have assisted us in achieving the ISO 9001:2008 certification.

We - Jyoti Dye Chem Agency are amongst the best Cutch Extract and tanning chemicals manufacturers, suppliers and exporters. In addition, we are formulating Ferrous Sulphate Fe 30% min, Manganese Oxide mn 60% min, Potassium Iodate/Iodide, Sodium Selenite Se 45% min and other products. Manganese Sulphate mn 32% min is packed and stored under the guidance of expert personnel. Stable under ordinary conditions, manganese sulphate is a catalyst used as fertilizer additive. In the manufacture of varnish driers and paints, it acts as a good reducing agent.

Key Facts

No of Staff	20
Year of Establishment	1985
OEM Service Provided	No

Our Products

Potassium Iodate

Manganese Sulphate

Myrobalan Powder

**Zinc Sulphate
Heptahydrate**

Cobalt Sulphate

Manganese Oxide

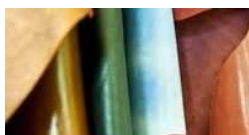

Sodium Selenite

Cobalt Carbonate

Potassium Iodide

Leather Chemical

Dried Ferrous Sulphate

**Ferrous Sulphate
Heptahydrate**

Calcium Iodate

Copper Sulphate

Leather Tanning Agent

**Natural Tanning
Chemicals**
