Company Profile :

"Santkrupa Group" - established in the year 1986 with a vision and mission of making a mark in the SANTKRUPA STEEL INDIA PVT. LTD. Pioneered by the visionary Shri Kantibhai Pragjibhai Gohil, SANTKRUPA aims at the best of industrial standards and constantly adding new products in their kitty.

SANTKRUPA, keeping with its organizational values of Customer Orientation & continued value Addition, has ventured into Roofing Sheet Manufacturing, Structureless Roofing Systems & All Type Roofing Related Machine.

SANTKRUPA STEEL INDIA PVT. LTD. provides roofing solutions for commercial roofing, Godowns, garages, agriculture and industrial groups like warehouses, large sheds for agri commodities, swimming pool, banquet halls and animal shelter etc.

SANTKRUPA STEEL INDIA PVT. LTD. started with a vision to provide world class products manufactured in a state-of-the-art production units. SANTKRUPA STEEL INDIA PVT. LTD. Aims at providing a Quality product with a very competitive price range. These products will be designed to meet-up sector specific demands and will ensure a fine products passed through A STRICT QUALITY check, on time delivery and satisfactory on-site installation.

Our state-of-the-art roofing structures are designed for durability quality and safety for generations. Such structure provide the following advantages :

- Free movements & effective handling of goods
- Higher flexibility in space utilization
- Maximum protection of goods against water seepage
- Protection from Wind & rain
- Nut bolt free and hence rust free construction
- Faster project turnaround
- More cubic meter space
- No spoilage of goods due to bird-nuisance

Customer Visit in Company:

Our Company

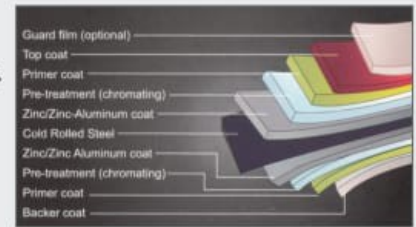

About the Product :

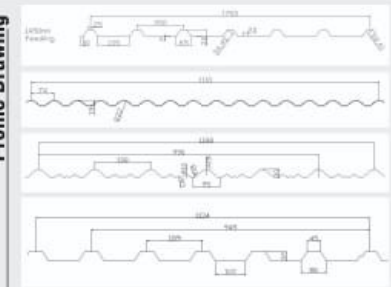

Pre-painted with a substrate of Zinc coated steel, these are ideal floor roofing and cladding all kinds of constructions. Available in a range of sizes and colours, that can be easily adapted to any design these sheets are the latest trick in the building trade.

Features :

- High corrosion resistance provided through 120 gsm thick coating of Zinc or 70/150 gsm coating of Zinc-Aluminum alloy.
- Better Load bearing capacity since it is made of steel sheets having 550 MPa yield strength
- Lower thermal conductivity that provides better cooling
- Adds aesthetic value to projects with uniform provides better cooling

Profile Drawing

Trapezoidal Profile :

- Input coil width : 1450/1220 (-0.00/ + 10mm)
- Cover width : 1025 (+/-10mm)
- Depth : 28 mm (+/-2mm)
- Material : Pre-painted Zinc coated
- Steel Grade : 500/250 MPa
- Thickness : 0.40 to 0.80

Product Details (PPGI/PPGL) :

Substrate	Cold rolled steel
Yield strength	550 MPa
Tensile strength	570 MPa
Zinc coating	120 gsm
Primer coating on top & bottom-PU/Epoxy	2-5 microns
Paint top coat - RMP	18-20 microns
Paint bottom coat	3-6 microns
Total coated thickness (TCT)	0.47 mm
