

Termination Kit Components

Heat Shrink Tubing

Insulates and protects cable connections, shrinking when heated to provide a tight fit and resistance to chemicals and environmental stress.

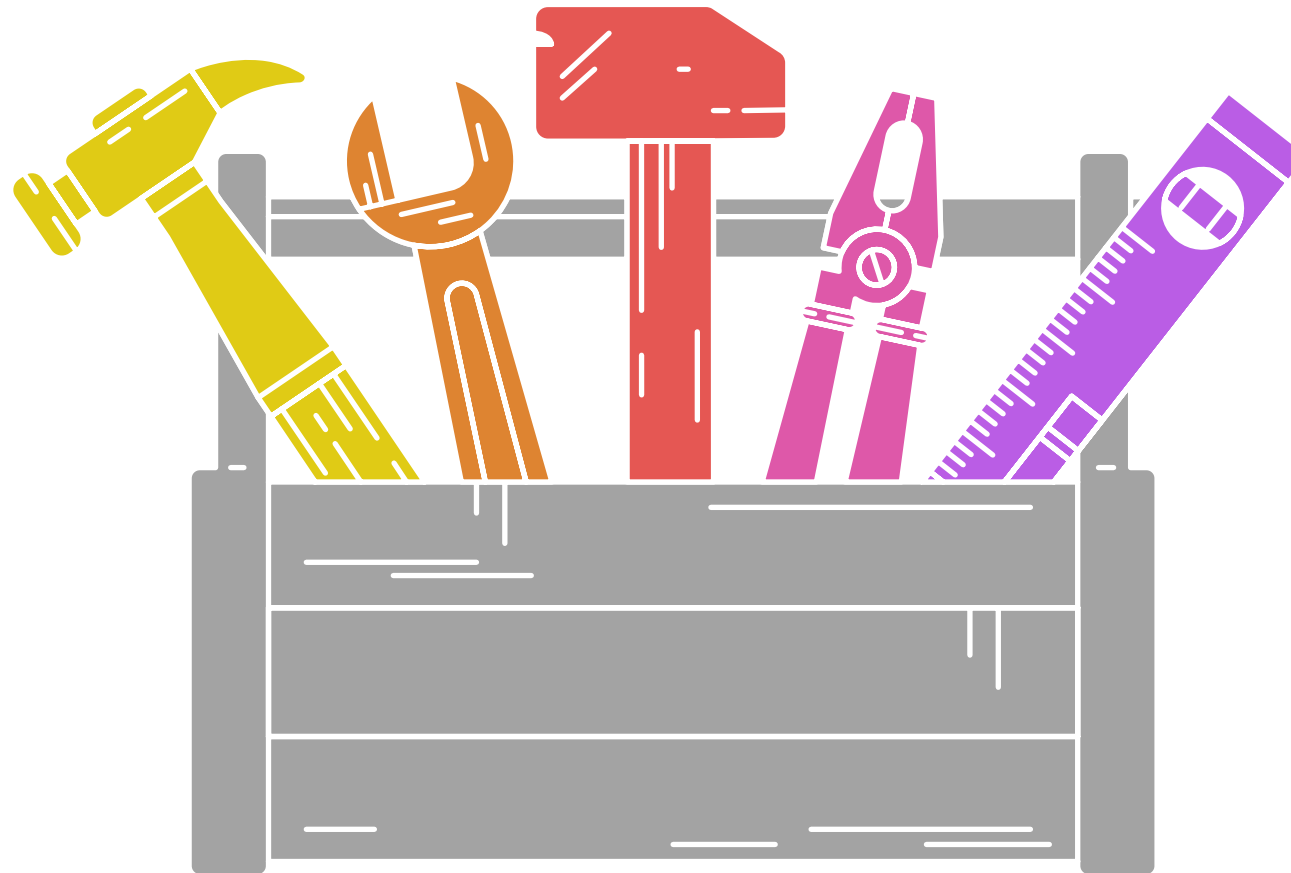

Cable Glands

Secure cable entry points and are available in various sizes to accommodate different cable diameters, ensuring a tight seal.

Termination Enclosure

Durable, UV-resistant materials protect against environmental factors and a gasket seal prevents water ingress.

Connectors

High-quality connectors designed for outdoor applications ensure reliable electrical connections and corrosion-resistant materials enhance longevity.

Installation Accessories

Includes adhesive, mounting brackets, and screws to facilitate easy and secure installation of the termination kit.
