## About Us

Hospital Engineers Care India is a well-established and trusted organization based in Panipat, Haryana, dedicated to meeting the diverse requirements of the medical sector across India. For several years, the company has been actively engaged in manufacturing a superior range of products, including Medical Monitor Stand, Oxygen Gas Cylinder Manifold, Oxygen Flow Meter, Operation Theater Suction Trolleys, and more. These products are manufactured using high-quality raw materials, ensuring enhanced durability, corrosion resistance, and long service life. To maintain industry standards and ensure defect-free performance, each product undergoes stringent quality checks using advanced testing tools and instruments.

Backed by rich industry experience and a strong market reputation, we have emerged as a preferred manufacturer and supplier in the medical equipment sector. The cornerstone of our success lies in the unwavering support of our employees, clients, vendors, and investors, whose contributions have played a vital role in our growth journey. We remain deeply grateful for their continued trust and cooperation. To sustain our leading market position, we continuously focus on improving product quality, design, and performance. Additionally, we employ world-class technology and modern machinery in our manufacturing processes while strictly adhering to prevailing industry norms and guidelines. Under the able leadership of our proprietor, Mr. Neeraj Kumar, the company has witnessed remarkable growth and expansion. His vision, dedication, and guidance serve as the backbone of the organization, driving us toward new milestones of success.
