About Us

AKSHAY CHEMICALS is a leading manufacturer of High value added Heptaldehyde, Methyl Undecylenate, Undecylenic acid, Oenanthal sodium bisulphite, Methyl Ricinoleate. At Akshay Chemicals we manufacture GENERATION II and III castor oil derivatives complying with highest standards of quality in the field. In spite of being the largest castor oil exporter by far (75% of global exports), India is able to capture only about 25% of the total value from the market. We are part of Make in India Mission. The Make in India initiative was launched by our Honorable Prime Minister Shri Narendra Modi in September 2014 as part of a wider set of nation-building initiatives. Devised to transform India into a global design and manufacturing hub.

We have set up our unit in Maharashtra's backward region i.e. VIDHARBHA. We will also be going for Backward Integration. Our Target is to be a fully integrated business unit. Future plans are to undertake and implement Contract farming initiatives. This will Encourage Growth of Castor in Vidarbha region and thus will provide support to castor farmers.
