Since 1980

KADET-120

Portable ARC Welding
Transformer

Truly go-anywhere unit !

DUTY
CYCLE
20%

KADET-120

**Handy
Model**

ARC WELDING TRANSFORMERS

SALIENT FEATURES

- Modern looks, novel design concepts
- Lightweight and compact.
- Real portability for one person to do welding at off places like civil work sites etc.
- Made from high-grade materials.
- Protection against overload by thermal cut-out.
- Works even on domestic power line.
- Reliable and durable.
- Epoxy powder coated body for long life.
- Coil varnishing by vacuum pressurised impregnating varnishing system.

SPECIFICATIONS

PARTICULARS	UNITS	
Input Supply	Volts	230V, 1 phase, 50Hz
Input amperes	Amps.	29
Max. open circuit voltage	Volts	55
Nominal current output	Amps.	120
Welding current range [Step less]	Amps.	20 to 120
Duty Cycle		20%
Electrode sizes		2 - 3.15 mm.
Dimensions (approx.)	L - MM	360
	W - MM	190
	H - MM	350
Cooling		Forced Air Cooled
Insulation	Class	F
Weight [Approx]	Kgs.	20

Note : We reserve the right to modify the equipments and change the specifications without prior notice as a part of the continuous development research policy.

WE ALSO MANUFACTURE :

All types of arc welding transformers, spot welding machines, pneumatic spot welding machines, welding rectifiers, MIG/MAG welding machines, TIG Welding equipments, electroplating rectifiers & step-up transformers.

Mfg. by :

An ISO 9001:2008 Certified Company

CANARY ELECTRICALS PVT. LTD.

"Arc House", Moon Nagar, 2- Lati Plot, MORBI - 363 641 - Gujarat (India)
