# About Us

Incorporated with the mission to present solution-based organic industrial chemicals across a wide industrial spectrum, Alpha Chemicals Pvt. Ltd. was set up in the year 1995. We are a renowned manufacturer, importer, exporter and supplier of a wide range of surfactants for personal care as well as pharmaceutical usage like Sodium Lauryl Sulphate (S.L.S) Powder, Sodium Lauryl Ether Sulphate (S.L.E.S), Sodium Lauryl Sulphate (SLS) Liquid, Triethanolamine Lauryl Sulphate (T.L.S), Cocodiethanolamide, Cocomonooethanolamide, Benzalkonium chloride, Lauryl Betaine, Alphanol-CS, Cocobetaine, Alquat - 50, Glyceryl Monostearate, Ethyleneglycolmonostearate (EGMS), etc. In addition, we are importing high grade raw materials of chemicals.

We have started another unit at Khopoli, which is an R & D based manufacturing unit for pharmaceuticals and specialty chemicals. We are now also engaged into custom synthesis of impurities, process related impurities (quantity from mg to gm), reference standard, unknown impurity isolation, classification and identification intermediates and specialty chemicals. We also deal in material COA along with 1H-NMR, GC/HPLC purity and mass.

The credit for our safe and effective range of chemicals goes to our professionals who are qualified enough to maintain complete safety and customize the manufactured products to suit any type of industrial application. Adopting advanced technologies and refining processes, while exploring wider applications have assured us to secure our position and we believe in creating opportunities for the future.

We have developed a core competence in both the domestic and overseas markets, by developing widely applicable, efficient and cost effective products. The company's extra efforts, taken in terms of research, production and quality control, go in sync with the international codes. We export our products to several countries of the world.

# Best Quality

Our chemicals are acclaimed as the prime drivers of growth in the pharmaceutical and cosmetics industrial sector. Alpha Chemicals Pvt. Ltd.'s manufacturing processes have been set up to incorporate any changes with client centric specifications. We abide by all the quality parameters while sourcing superior quality raw materials. Our expert team of quality controllers ensure that our products do not suffer from any kind of damage while manufacturing, transporting, storing or application.

# Our Products

**Lauryl Sulfate Powder**

**Fatty Alcohol Sulphate Powder**

**Sodium Lauryl Sulphate**

**Sodium Lauryl Ether Sulphate**

**Sodium Lauryl Ether Sulphate  
28% To 30%**

**Foaming Agent, Wetting Agent**

**Sodium Laureth Sulphate**

**Sodium Lauryl Ether Sulphate**

**Sodium Lauryl Sulphate Liquid**

**Triethanolamine Lauryl Sulphate**

**Baby Shampoo Applications**

**TEA Lauryl Sulphate**

**Coconut Diethanol Amide**

**Foaming Agent**

**Cocodiethanolamide**

**Coco monoethanolamide**

**Cocamide MEA**

**Cationic Fabric Softener**
