**EASY TO BUY, INSTALL AND MANAGE. DOING THE JOB AT ALMOST NO COST.**

Our company offers a complete range of ozone-based systems for Ro systems, wastewater treatment, and disinfection needs. Growing environmental challenges require reliable solutions to mitigate energy demand, water use, chemical use and solve dire sanitation needs - locally, regionally, and globally.

Our innovative water treatment OZONE systems provide efficient operation with seamless integration in a multitude of industries and applications worldwide.

Our high-performance OZONE systems are implemented to help secure high-quality process water, improve disinfection processes, treat complex industrial wastewater and improve product shelf-life in the food & hygiene sector, process manufacturing, commercial pools, and many other enterprises.

Ozone water treatment brings advantages compared to chemicals and hot water. Ozone is produced on-site from the air - a raw material free of cost. No purchases, no transports, no handling, no storage, no refills. Ozone decomposes to oxygen after use. No waste, no residues. In all, minimal operating cost and environmental impact.

## Application Areas

## WORLDLY FEATURES INTELLIGENTLY INTEGRATED

Understanding ozone treatment is all about understanding processes - and making all components work as one. That's why we design, manufacture and test all OZONE systems before delivery to ensure efficient, reliable and cost-effective operation. We wouldn't have it any other way.

## About AQUA ART & ENGINEERING

Our unique technology and extensive expertise have made us a rapidly growing global company. All development and manufacturing is located in India. In addition, we have in-house specialists for consultation, planning, installation and service.

As a Centre of Excellence within air and water treatment, we also collaborate in international efforts to develop global standards for purification solutions.

At Our company, we have a strong incentive to reduce energy consumption, health risks and the impact on the environment. Our current solutions provide a multitude of benefits in the processing and food industry, real estate, commercial kitchens as well as in the retail market.
