About Us

Carpenter Engineered Foams India Private Limited is a reliable manufacturer and supplier of engineered foam products and acoustics solutions to cater the different demands at various places like residential, commercial, industrial, and specialized. The company has a solid knowledge of the product and understands how to control sound, comfort vibration and performance in materials. It offers a wide range of products, designed to meet the needs of customers looking for reliable solutions in the fields of acoustic treatment, insulation cushioning and vibration control.

The company offers Cadbury Acoustics Foam developed for applications where effective sound management and acoustic comfort are important considerations. Its Bonded Foam Mattress collection offers the right support and cushioning solutions for various needs. Carpenter Engineered Foams India Private Limited also offers PU Foam for Acoustic Noise Control Solutions, which can be used in various settings where unwanted noise and the need for enhanced acoustic conditions are crucial. The company supply Vibration Isolators along with foam products that are designed to be used in applications where unwanted vibration and mechanical movement needs to be controlled. These products can be used to assist equipment and system vibration reduction in environments where it will help to achieve better operating conditions and equipment performance.
