JONSON EXTERIOR CEMENT PRIMER

About Us

It all started in the year 1980 with an ambitious goal to revolutionize the entire paint market. The idea was to provide premium quality paint products at an economical price, despite being aware that the competition will be tough. Yet, we trusted ourselves and always believed that when going gets tough, tough gets going. Modern Paints faced a lot of obstacles in terms of capital, physical resources, and intangible factors, but we did not deter from our path and continued our perseverance because we wanted our customers to feel extravagant, rich, and fabulous after using our paint. We want our paint to be remarkable, with the ability to provide a sense of satisfaction among the customers who have used it. Initially, we had only a few varieties in our paint spectrum, but now we have a plethora of paint products ranging from water-based enamel, luxury emulsion, economic emulsion, distemper, enamel, and all sorts of primers. In recent times, our business year-over-year growth has witnessed a phenomenal 2x rise, but we consider this only the beginning, because for us, SKY IS THE LIMIT.

Our company, Modern Paint And Chemical, is currently recognised as a respectable name in the paint industry as a result of the outstanding items we provide. Many of the customers highly appreciate our impressive product selection, which includes Jonson Exterior Cement Primer, Excellent Acrylic Distemper Paint, Deepak Acrylic Distemper Powder, Wallguard Interior Emulsion Paint, Modern Plus Synthetic Enamel Paint, Jonson Exterior Plastic Paint, and many others. To ensure that our products give the best results, we only use finest grade of raw materials. To meet the quality requirements, our company uses strict quality testing techniques. Additionally, we have our facility situated in the city of Indore, Madhya Pradesh, India, from where we quickly transport the products to clients.
