## Salient Features

- Glass lining provides excellent resistance to corrosive substances, making it suitable for distillation of acids, alkalis, and other corrosive chemicals
- Offers efficient heat transfer due to the smooth and non-porous surface of the glass lining, minimizing fouling and maximizing thermal conductivity
- Allows for visual inspection of the process fluid, facilitating monitoring and maintenance activities
- Suitable for applications where product purity is critical, such as in pharmaceutical and food industries
- Aesthetically and ergonomically build machine for best performance
- Latest technology for better performance and improved efficiency
- Produced in an advanced state of the art manufacturing facility
- Low maintenance and operating cost
- Sturdy design to ensure long life and trouble-free operation
