NCR/CARBONLESS PAPER

"Our Products are Now Available on Amazon.com"

Description

Carbonless paper is coated with two different types of chemicals: CF or Coated Front, and CB or Coated Back. These chemicals are held in tiny capsules and are released when the capsules are burst by pressure from a pen or printer.

When the CF and CB chemicals interact, the CF chemicals darken causing an image to appear on the CF side of the sheet. One easy way to tell that the CF and CB chemicals are different is that the image appears on only the front sheet; there is no image on the back of any sheets.

Since this type of paper produces an image without carbon, it is called "**CARBONLESS PAPER.**"

Product

Each Surya Coats Carbonless form set consists of the following:

Top Sheet - CB (Coated Back)

With ink-releasing microcapsule layer on its underside.

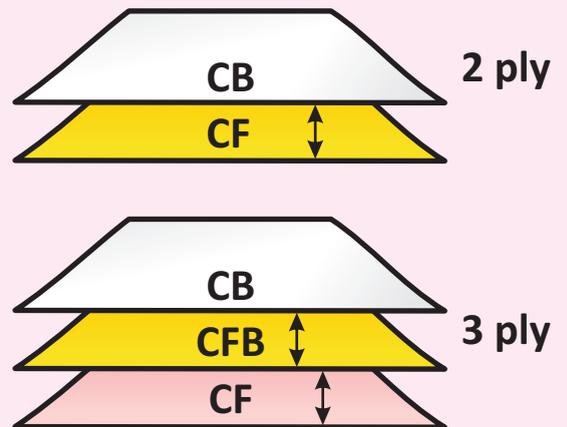

Middle Sheet - CFB (Coated Front and Back)

With ink-absorbing layer on the front and ink-releasing microcapsule layer on the back.

It is possible to use more than one middle sheet

Bottom sheet - CF (Coated Front)

With ink-absorbing layer on the front.

For special applications, we also supply paper coated on the front with both ink-releasing and ink-absorbing agents in a single layer. The colour reaction takes place within this layer when pressure is applied by a writing implement. Papers of this type are known as 'self contained' papers.

Self Contained SC is suited for use together with any type of standard paper as top sheet, e.g. letterheads, watermark paper or self- adhesive labels.

Surya Coats Carbonless paper is suitable for hand writing implements, typewriters or dot-matrix printers. The maximum number of copies possible depends on the grammage of the paper and the applied pressure or impact force.

When using standard paper types such as CB 54 / CFB 58 / CF 54 up to 6 copies can be attained.

Key Features

Environmental friendly & Cost effective.
Bisphenol A (BPA) Free.
Laser Printer Compatible Carbonless.
Customised Colours in CB, CFB, CF & SC.
Super Smooth & Anti Curl Coated Paper
6A Waxpick Clear.
Also Available in Black & Blue Image

Available Size

All sized Jumbo Roll & Sheet
GSM ranging form 50 to110 GSM
POS 2 ply & 3 ply Rolls

Packing

Surya Coats Branded Ream Packing
Neutral Ream packing
Jumbo Roll
2 & 3 Ply POS Rolls (Box Of 40 Rolls)

Storage

The amount of time that copies can be kept without degrading is important in view of the different periods of time required by law for storage of business records.
We have officially tested and approved.
Tests have shown that archiving times of over 25 years are achieved using typical filing or folder systems.

The copying properties remain virtually unchanged for up to three years.

Surya Coats carbonless paper is supplied with a relative paper moisture of 38-50 % at 21°C.
Experience has shown that these are the most favourable conditions for achieving good printing results.

Surya Coats Private Limited,
Plot No.:2016/B/2, Kalol-Vamaj Road,
Village Vamaj – 382728.
