## About Us

Started business operations in **1982**, we, Weldor **Appliances Pvt. Ltd.** are a private limited firm which has great reputation in the Indian and global markets. The company is totally efficient in manufacturing a quality assured gamut of **Plate Bending Machine, Automatic Shearing Machine, Power Press, Industrial Semi Automatic Press Brake Machine, Hydraulic Ironworker Machine** and other products. The components outfitted in these machines and equipment are world-class as they are sourced from authorized vendors.

With the intense desire to become a leading **manufacturer** and **exporter** globally, we are putting our best foot forward in all the tasks. We have the support of our mentor, **Mr. Dhanraj Vaghela** whose rich experience and sharp business acumen allow us to face the challenges and survive in this competitive world. Through his futuristic business approaches and modern ways of running the business, our company has carved a niche for itself in the international marketplace.

## Infrastructure & Facilities

For the smooth operations of the company, we have developed a modern infrastructure facility which has advanced technologies and tools. The unit is segmented into varied departments including production, engineering, quality testing, R&D, packaging, sales & marketing, etc. For enhancing our production capabilities, we keep upgrading our installed machines & tools. Below listed are some of the facilities installed in our manufacturing unit:

- ✿ Here at our entity, we produce different kinds of Welding Tables having a hole system of 16mm and these holes are drilled using CNC machines which provide square angle grid in all the possible directions. Parts are usually created by initially placing them at the right angle to the stops on the side & front edges of the welding tables. This is highly important for maintaining right angles during the welding of huge parts & components.
- ✿ System 16 is super beneficial for providing multiple holes in a particular given area for all the accessories get clamped.
- ✿ Generally, welders get irritated due to unavoidable welding spots & spatter available on the platform surface that develops bumps which are hard to remove.

# Our Products

**300 Ton Press Brake Machine**

**Mechanical Press Brake Machine**

**Semi Automatic Press Brake Machine**

**Industrial Semi Automatic Press Brake Machine**

**Hydraulic Press Brake Machine**

**CNC Press Brake Machine**

**CNC Synchro Press Brake Machine**

**Automatic Hydraulic Press Brake Machine**

**Industrial Hydraulic Press Brake Machine**

**Control Panel Box For Press  
Brake Machine**

**Automatic Shearing  
Machine**

**Hydraulic Shearing  
Machine**

**Undercrank Shearing  
Machine**

**Plate Bending Machine**

**Section Bending Machine**

**3D Welding Table**

**3D Welding Fixture Table**

**Steel 3D Welding Table**

**WELDOR APPLIANCES PVT LTD.**
