

## Our ——— introduction

We are a manufacturer enabling individuals to live happy, healthy lives. We too are normal people just like you. Our founder has had his encounters with various brands claiming to be natural and chemical free, but couldn't find one brand that could be trusted for everyday body care needs. He realized he had to initiate the process on his own. Starting a herbal cosmetic brand comes with its challenges, educating himself about herbal ingredients, how they react with our body, and what roles these ingredients play in benefitting our body as whole. It was just a first step in the right direction.

Growth Natural

## Our Manufacturing Dream

Urban Organics is a dream bearing wings of reality. We manufacture personal care products with almost love and happiness, ensuring that any product manufactured under our facility must dictate quality.

Our systematic routines & quality checks make sure to circumvent harmful and banned substances in all our products.

## Cosmetic Third Party Manufacturing Company

# lifestyle changes

can also help

# protect your skin

## DETOX

Rid your routine of chemical and environmental irritants in your personal care items, laundry items, households cleansers, furniture, paint, etc.

## BEWARE OF BACTERIA

This means replacing your washcloth and pillowcase more often and tossing out old make up and cosmetic products. Wash your makeup brushes often and let them air dry.

## TEST

When you're trying a new product, always test it on your wrist, arm, or behind the ear first before putting it on your face or more broadly on your body.

## AVOID YOUR TRIGGERS

As much as you can, avoid common triggers like harsh soaps, alcohols, chemicals and fragrances. Check the labels on your skin care products.

## USE A HUMIDITER

Unless you live in a humid climate, use a humidifier to help your skin stay moisturized.

## MANAGE STRESS AND ESTABLISH A HEALTHY SLEEP SCHEDULE

Stress and sleep are significant lifestyle factors that can affect skin health.
