Technical Specifications

Product Name	Brushed Stainless Steel Cylindrical Planter
Body Material	Grade 304 Brushed Stainless Steel (Corrosion and rust resistant)
Shape & Geometry	Symmetrical Circular Cylinder with Seamless Vertical Finish
Recommended Flora	Sansevieria Trifasciata (Snake Plant) or vertical architectural indoor plants
Application	Indoor corridors, office partitions, hallways, and hotel lobbies
Base Construction	Weighted anti-tip base plate with protective floor-scratch pads
Finish Options	Brushed Satin, Mirror Polished, or Titanium PVD Bronze / Matte Black
Maintenance	Low-maintenance metallic shell; wipe clean with micro-fiber cloth

Key Architectural Features

- **Sleek Commercial Aesthetic:** Clean metallic cylindrical lines offer an upscale contemporary look that complements glass and aluminum office architecture.
- **Robust Construction:** Heavy-gauge Grade 304 stainless steel resists denting and environmental wear in high-traffic commercial corridors.
- **Stability & Balance:** Engineered with a balanced inner weight distribution to safely support tall architectural plants like Snake Plants.
- **Uniform 360-Degree Profile:** Perfectly symmetrical construction ensures an immaculate look from every viewing angle in open spaces.

Custom Heights & Diameters

Custom dimensions, specialized rim details, and integrated self-watering inner liner inserts are available for corporate interior design packages and commercial contractor orders.
