About Us

Ventured out as an importer and trader in polymer raw materials, GF Impex provides hassle-free sourcing solutions of Virgin Polymer Raw-materials and Industrial Lubricants to manufacturers. Coming from a manufacturing background, we understand the pain of a customer when the machine has to stop for want of raw material. We keep track of our customers' long and short-term production schedules and help them plan their raw-material supplies. We give regular inputs on price movements and material supply-demand scenarios, so our customers are well informed to make necessary arrangements.

With the successful implementation of the above approach for over a decade and a half, a sizeable number of manufacturers regularly source their polymer raw materials from us. To expand our services to these manufacturers and more, in 2022, we have added one new product line - Industrial Lubricants to rediscover ourselves as a supply-chain partner for manufacturers in and around Chennai. Reach out to us for high-quality oil and greases requirements for your manufacturing facility.

GF Impex started as a polymer raw-materials trader and importer. We help factories get the Industrial Lubricants and Virgin Polymer Raw-Materials they need with no effort. Because of our expertise in manufacturing, we know how frustrating it is for a client when their production line must be temporarily halted due to a lack of necessary components. For our clients, we monitor both their short-term and long-term production schedules. We offer advice on how to allocate their materials best. Our customers can plan with confidence thanks to the consistent updates we provide on the state of the market and how it affects prices and the availability of raw materials. For over fifteen years, we have supplied numerous factories with polymer raw materials thanks to the strategy above. In 2022, we rediscovered ourselves as a supply-chain partner for businesses around and in Chennai by introducing a new product line: Industrial Lubricants, which allows us better to serve the manufacturers above and others in the region.
