MOBILE VEHICLE Mounted X-ray Scanner

Approved by

Mobile Vehicle Mounted X-ray Scanner

Technical Specification

On Vehicle Mounted X-ray scanner is a highly functional portable X-ray inspection system, which has been engineered for scanning the loaded on vehicles, Vehicle X-ray scanner ensures the speedy as well as identification of metals as well as organic and non-organic materials. This is an effective detecting solution, X-ray scanner low bed vehicle-mounted X-ray Inspection System (XBIS) with tunnel size of 650 mm (W) x 500 mm (H). It has been developed to protect VIPs/event crowds at different remote locations where permanent security infrastructure is not available.

Market Application

- Police and Paramilitary
- Defense establishments
- VIP Security
- Event Security

Features

- Low bed conveyor
- World class image quality
- Retractable flaps for weather protection
- Wire Resolution of 38 AWG
- High performance – Typical penetration up to 35 mm of steel
- Atomic number signature based material discrimination
- 3 color and 6 color based on atomic number signatures
- Foldable input and output rollers

Optional Features

- CCTV coverage on both sides
- 2 way communication

Accessories

- Uninterrupted power supply
- Standby generator
- Input/output rollers

Additional information

- Product Beam Direction From Top
- Product Max. load 165 kgs.
- Product Power Consumption 0.5 KVA
- Product Intensity 35+ mm
- Product Mobility Portable
- Inspection Tunnel size 650 (W) x 500(H)
